

# Rocket® Mobius

## Modernize and govern business-critical content with Mobius

Rocket® Mobius is an enterprise content management solution that empowers organizations to embrace new ways of working while securing and governing sensitive information. Mobius helps break down information silos across numerous business and technology ecosystems, enabling teams to connect applications, streamline processes, and simplify user access. It helps reimagine and automate content-rich business processes – from mainframe to cloud – while complying with dynamic privacy and regulatory demands.

### Benefits/Features

#### Mainframe modernization

Lower costs, simplify workloads, and reduce mainframe vendors using special tools and cloud options.

#### Content vendor consolidation

Improve productivity and legacy workflows by reducing costs, vendors, and complexity.

#### Automated governance

Organize, secure, verify and manage information lifecycles automatically at scale, for low-cost compliance.

#### Cloud modernization

Modernize to the cloud – hybrid or all-in – to lower costs without compromising security.

#### Microsoft and SAP modernization

Maximize your ecosystem investments from Azure to HANA, 365 to SAP collaborations, and more.

#### Digital transformation

Make your business more competitive and enhance, experiences and efficiency through process improvement.

# What our customers have to say

Rocket Mobius provides us with a sense of security. When we had to switch to remote work due to COVID-19, we were ready because all our processes archival, retrieval and storage were electronic with Mobius.”

## With Rocket Mobius you can:

### Lower compliance and governance costs

Comply with policies even with small staff via automated OCR and data mining that delivers control over information lifecycles, workflows, and integrations.

### Transform UX with sensitive data

Improve UX by redacting sensitive data with location, metadata, and time-based access control, allowing staff to provide service confidentially.

### Create agile delivery at your pace

Deliver solutions faster with cloud, hybrid, and prem support using tech standards that create flexibility in your IT roadmap.

### Connect all data via a single view and API

Improve user experience via single view and API that federates information across content silos, and increase innovation by simplifying development efforts.

### Retire and consolidate systems

Reduce costs while simplifying operations and experiences by consolidating systems matching IT roadmaps with federation and consolidation tools.

### Achieve unstructured data insights

Use your BI to make visible unstructured data and automation for dashboards and KPIs, improving the performance of key business, governance, and IT functions.

60% of today's corporate data is unstructured

2.5 quintillion bytes of data are being generated daily worldwide.

Only 1/3 of unstructured content and data is governed.
