

Rocket[®] EOS[®] 360

Deliver business-critical information fast
while reducing compliance risk

Rocket EOS 360 is a comprehensive output management solution that integrates with mainframe environments to handle the capture, storage, and secure access of application output data. Its integration with Mobius View enables a common content viewing platform between Mobius and EOS 360 and delivers enhanced federation and redaction capabilities.

Benefits/Features

Realize cost savings

Streamline output management processes to reduce manual intervention and MSU consumption while optimizing operations.

Enhance user experience

Deliver business-critical information directly to users quickly while integrating web services to build customized experiences for partners and customers.

Enable efficient business workflows

Timely, secure delivery of critical business information empowers employees to make better-informed decisions and respond to critical data quickly.

Improve data accessibility

Drive data utilization and analysis through centralized and standardized output management.

With Rocket EOS® 360 you can

Integrate with mainframe environments

Seamlessly integrate with your mainframe systems to capture output more efficiently from various applications running on the mainframe.

Securely capture and store data

Seamlessly capture output data, such as reports, documents, and other business-critical information, and securely store for future reference and use.

Enable fast and secure access

Quickly and easily access output data while safeguarding its integrity — only authorized users can access specific information, reducing the risk of unauthorized data exposure.

Streamline operations

Automate the output management process to streamline operations, reduce manual interventions, and increase operational efficiency.

Promote data trust

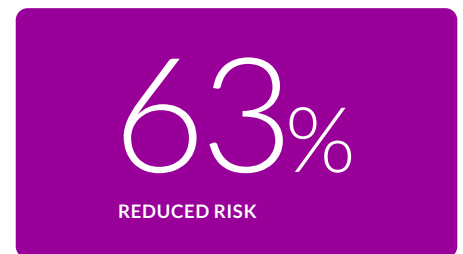

Standardize the output management process to promote consistency and reliability across your organization's data delivery devices.

Rest easy

Implement encryption and access controls to protect sensitive information and maintain compliance with data privacy regulations.
