

Rocket® CorVu NG

Business Intelligence and Analytics Solutions
with Rocket MultiValue

Rocket® CorVu NG works well with Rocket® D3 DBMS, Rocket® mvBase DBMS, Rocket® UniData, and Rocket® UniVerse:

CorVu NG is built to understand the MultiValue database structure and directly engage, via Native TCL, with the D3, mvBase, UniData, or UniVerse engine.

Rocket CorVu Business Intelligence tools for reports and dashboards integrate with Rocket® SystemBuilder Extensible Architecture (SB/XA.)

CorVu NG enables you to:

Extract relevant information from unstructured text

Access, visualize and understand enterprise data through interactive, dynamic dashboards

Access your dashboards and information wherever you go with the free Rocket CorVu mobile app for iPad and Android devices

Gartner's List of CIO Priorities Shows Business Intelligence and Analytics is the Top Technology Priority for 2015

(www.gartner.com/imagesrv/cio/pdf/cio_agenda_insights2015.pdf)

Have you been searching for a business intelligence solution that works well with your Rocket MultiValue database? Look no further than Rocket® CorVu NG, which provides you with unprecedented, real-time access to enterprise data using intuitive and dynamic dashboards, interactive drill-downs and easily digestible reports—letting you provide timely, spot-on information to desktop, web, and mobile users.

We Understand Your Business Needs and Challenges

You need to present data to decision makers in a way that it is easily digested and understood, and can be acted upon immediately. CorVu NG is the right solution to improve agility and speed of critical business decision-making through streamlined, robust data visualization.

CorVu NG enables you to provide different levels of visibility into data on a person-by-person basis. You're empowered to secure and protect your data, ensuring that only those who are granted access can view and interact with it.

Rocket CorVu NG also provides you with the ability to:

- ❖ Customize dashboard components for a virtually limitless variety of data presentation options
- ❖ Leverage geospatial maps: colorize regions based on data values and lay out data points/values by geographic location
- ❖ Drill down into any tracked performance metric for deeper analysis
- ❖ Integrate external and third-party content and documents into dashboards
- ❖ Deploy dashboards and reports to end users via HTML5, Flash or PDF
- ❖ Use a centralized object repository to easily share content between desktop and web users

Rocket's BI Solution is a Natural Fit with Rocket MultiValue

CorVu NG is built to understand the MultiValue database structure and directly engage, via Native TCL, with the D3, mvBase, UniData, or UniVerse engine. Any change to the MultiValue database is immediately recognized in CorVu NG. New tables, columns or Dictionary items are immediately available to CorVu NG, so there is no need to rebuild any cubes or intermediary layers. As an added benefit, you'll enjoy ultra-fast performance, as no "on the fly" dynamic normalization is needed. CorVu NG is simple to maintain and accelerates productivity by allowing you to add columns and files on-demand without needing to do another extract or rebuild of a hypercube. The recent versions of Rocket® System Builder Extensible Architecture (SB/XA) have been specially designed to leverage the Rocket CorVu Business intelligence suite to provide world-class reporting and interactive dashboards to all types of users.

Ample Customer Support for CorVu NG

We offer the same great support for CorVu NG that you already receive with your Rocket MultiValue products. The Rocket Customer Portal provides customer and Rocket Business Partners with simple and direct access to Rocket Support. Customers receiving maintenance through a Rocket Business Partner will normally receive CorVu NG support from this Business Partner as well.

Rocket Professional Services Are Offered for Both New and Existing Customers

We offer the same great support for CorVu NG that you already receive with your MultiValue products. The Rocket Customer Portal provides customer and Rocket Business Partners with simple and direct access to Rocket Support. Customers receiving maintenance through a Rocket Business Partner will normally receive CorVu NG support from this Business Partner as well. Both new and long-standing customers can benefit from engaging Rocket Professional Services to assist in designing reports and dashboards. Our highly skilled consultants have strong business awareness, exceptional technical skills, and professional project management experience. For new customers, our Certified Consultants use our RapidROI Methodology to implement our software solutions, and to quickly deliver a return on your CorVu NG investment. For existing customers, our Certified Consultants offer:

- ❖ Fast-tracked delivery of new applications
- ❖ Optimization of existing Rocket CorVu applications
- ❖ Mentoring and knowledge transfer for customer personnel
- ❖ Advisement on any specific technical questions, business issues, or project matters
- ❖ Best practice reviews to investigate and recommend opportunities for more effective usage

Rocket® CorVu NG's robust dashboard capabilities allow you to see your data the way you want to see it, arming you with the knowledge you need to confidently make your biggest business decisions.
