## Bluegarden Group Denmark Simplifies Their Complex Payroll Solutions for Its Users Through the Implementation of Rocket Application System (AS)

Bluegarden Denmark is the leading provider of salary and HR solutions in Denmark. Every month, more than a million employees in approximately 80,000 companies receive their pay checks through their solutions or via outsourcing services.

They offer salary solutions to companies of various sizes – from the small entrepreneur with a few employees to some of Denmark’s largest private enterprises or public institutions.

Bluegarden Denmark also provides HR solutions, covering all aspects of a company's HR needs throughout their organization. Their value proposition is straight forward: ‘We make every-day business easier for our customers by supporting or performing their payroll and HR administration activities.’

### Agility: Be Nimble and Be Quick

In order to remain competitive and achieve their goals, Bluegarden Denmark is well aware that it needs to be agile and responsive to their clients.

They purposely seek out powerful technologies that help them create or modify applications and services in the most rapid and cost-effective manner. Acknowledging the clear-cut advantages of the software, Bluegarden Denmark embraces Rocket’s Application System as a valuable part of its arsenal.

Lotte Rosted Lind, Support Consultant for Bluegarden works closely with their solution powered by Rocket AS and comments on the role of Rocket’s product: “For more than 20 years we have been using AS to provide a user-friendly data-entry interface to our most complex salary system that is mostly aimed at larger companies with 500 or more employees.”

### Customization: Be Able to Adapt to Each Customer’s Data

“The salary system is highly individualized, accommodated to adapt to each customer’s needs. We also use AS to derive extra salary wages based on often complex parameters and to make high-complex data extracts from the system. Lind declares: “Our customers are delighted by the rapidity by which we can develop and correct the programs and supply the requested data in almost any data format.”

### Bluegarden Group Denmark Ballerup, Denmark

Bluegarden Group Denmark is part of the Bluegarden Group which employs more than 600 skilled workers in 12 different locations in Denmark, Sweden and Norway - essentially covering the entire Scandinavian market area. The Group has almost 40 years of experience in payroll and HRM and their ultimate goal is to stand as Scandinavia’s leading vendor of payroll and HR solutions.

"AS is a brilliant tool for many purposes," expresses Lind. "I'd like to accentuate the rapid program development and the ability to read, analyze, transform, and produce data in many data formats."
