# What is Servergraph Admin Center for TSM?

Servergraph Admin Center for TSM is a software package that enables you to manage your entire TSM environment through a graphical user interface and a command line interface.

You can easily perform your daily administration tasks, including detecting and fixing problems in your TSM environment, managing users, and allocating resources. With Servergraph Admin Center for TSM you can issue more than 300 TSM commands and cancel, change or edit command syntax in TSM version V5 or V6. Servergraph Admin Center for TSM empowers administrators to maximize the availability, performance, and security of your TSM environment with a single tool to manage all TSM servers running on any platform.

#### Key Functional Areas of Servergraph Admin Center for TSM

- Command View
- Policies
- Storage
- Client Automation
- Server Automation
- Activity Log

## **A**Rocket.

.

Fratient	✤ Access to all TSM tables	<ul> <li>Direct access to node data (backup,</li> </ul>	
Feature Summary	<ul> <li>Access to an ison tables</li> <li>Sorting and filtering on all tables</li> </ul>	archives, tapes) for auditing purposes	
Sarrinary	<ul> <li>Contextual help for TSM commands</li> </ul>	<ul> <li>Color-coded messages in Activity Log</li> </ul>	
	<ul> <li>Numerous export capabilities</li> </ul>	<ul> <li>Definition of custom views on any TSM</li> </ul>	
	✤ Access to one TSM server, all TSM	table	
	servers or a selection	<ul> <li>Specific node session restart on failed client schedules</li> </ul>	
	<ul> <li>Permission level viewing</li> <li>TSM scripts are editable and clopeable</li> </ul>	<ul> <li>Graphical, real-time trending of any</li> </ul>	
	<ul> <li>TSM scripts are editable and cloneable</li> <li>Restart failed client schedules by node</li> </ul>	numerical value	
	Testar failed client schedules by hode	<ul> <li>Configurable auto-refresh of table views</li> </ul>	
System Requirements	<ul> <li>Windows XP, 7 &amp; 8, Vista, Server 2003, Server 2008</li> </ul>		
	Red Hat Enterprise Linux 5 or 6, 64-bit		
	<ul> <li>SUSE Linux Enterprise Server 11</li> </ul>		
Architecture	✤ Web-based access	✤ Account management	
	✤ Client/Server	Group and user definitions	
	Server running on a Tomcat instance	Fine granularity of permissions	
	Java clients distributed via WebStart     (through a web browser)	settings	
	(through a web browser)	Activity log of user actions	

Use of native DSMADMC sessions
