BI Dashboards

Rocket®

IBM i
for the Digital Age

With more than 30 years of commitment to the success of IBM i customers, Rocket is uniquely qualified to deliver solutions that enable you to leverage the latest web, mobile, and cloud technologies, while protecting your investment in IBM i. Our portfolio of modernization products lets you extend the value of your proven applications by transforming the way they engage customers and employees. With new or enhanced user interfaces, web services, and APIs you can deliver capabilities with improved usability and greater productivity—without disrupting your underlying systems.

Rocket Solutions for IBM i provide a fast, efficient means to evolve your business systems on an ongoing basis so that you can more easily keep pace with emerging opportunities and business challenges.

HA/DR for system
operations

Business Information

Rocket Discover
Self-service charts,
graphs, and
dashboards

Automate Workflow | Simplify Compliance | Visualize Information

Rocket® Aldon Lifecycle Manager
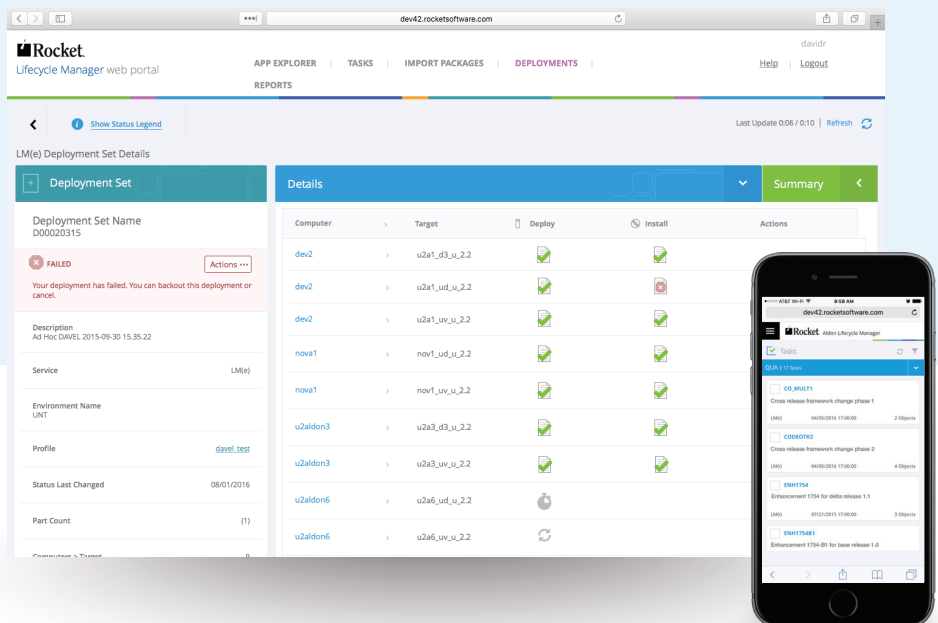

For Application Developers

Manage and automate DevOps for all your platforms including IBM i, Windows, web, and mobile.

- Simplify audit compliance
- Automate promotions
- Automatically build everything– including your mobile apps
- Securely version and store your source
- Track application usage with automated analytics
- Keep all devices up-to-date
- Track and manage your change requests

For IT Operations Managers and Release Managers

Easily manage and automate all application deployment to your enterprise targets.

- Automate & synchronize deployments
- Synchronize web, Windows, mobile, IBM i, and MV deployments
- Get success/failure notifications
- Gain visibility into log reports
- Backout deployments with a push of a button
- Gain integrity verification
- Manage versions
- Track history

Rocket® Aldon Community Manager

For Development Managers and Release Managers

Connect application development and IT services to collaborate and deliver the right software at the right time.

- Define and manage software requirements from implementation to production

- Accelerate workflows and approval processes

- Respond to changes quickly in coordination with business objectives

Rocket® API

For Application Developers

Convert 5250 screens into new reusable RESTful services.

- Orchestrate functions and data requests from multiple sources, platforms and applications into composite services

- Automatically generate RESTful services from existing applications without coding

- Create updated, flexible workflows with newly generated web services

Rocket® LegaSuite

For Application Developers

Transform existing green screen applications into new web or mobile user experiences.

- Rapidly convert iSeries 5250 green-screen applications
- Create flexible HTML5 based apps for desktops, web, or mobile devices
- Streamline business processes and workflows

Rocket® Servergraph

For Backup Administrators and IT Operations Managers

Reduce the cost and complexity of monitoring and reporting on the IBM i platform.

- Save on costs and resources by automating IT processes and recovering storage space
- Isolate and resolve issues before they affect performance via "single pane of glass" view
- Simplify audit preparation and ensure compliance with corporate policies and regulatory requirements
- Get the right information to the right people at the right time

Rocket® iCluster

For Backup Administrators and IT Operations Managers

Get peace of mind and complete business continuity with High Availability / Disaster Recovery (HA/DR) replication solutions.

- Protect your business with real-time replication and immediate recovery

- Provide the highest fidelity through match-merge of audit and database transactions

- Get high-speed operational switching and access between geographically distant locations during planned and unplanned downtime

- Empower any server to be the master for easy, fast configuration, with updates to all other servers automatically

- Replicate data to a data warehouse for near real-time analytics that don't impact production systems

Rocket® Discover

For Business Intelligence Analysts

Bring your IBM i data to life with self-service business intelligence dashboards.

- Easily share dashboards to facilitate business collaboration

- Reduce reliance on IT

- Combine antiquated, internal BI systems and their data sources into one easy-to-use dashboard

- Eliminate the need to integrate BI tools into legacy green screen applications

Businesses Run on Rocket

We make software that the world's biggest companies trust to run their critical infrastructure business processes, and data while extending the value of these assets to new innovations such as cloud, analytics, and mobile. More than 10 million IT and business professionals rely on Rocket to run their most critical applications, business processes, and data.
