

Rocket® Mobile Terminal Emulator (TE)

Green Screen On-the-Go

Access System z (TN3270) or IBM i (TN5250) systems from any device, including iPad, iPhone, Android, and Blackberry

No software component to download or install

Easily integrates with your web server's security features for encryption and authentication

Configuration is handled through a single, centralized server

Eliminates the need to deal with consumer-oriented app stores

Customize your terminal emulator session interface using standard HTML, CSS, and JavaScript

Only pay for simultaneous users—not per installation

anytime. anywhere.

Do you have a need to take terminal emulation to mobile devices regardless of device? With Rocket® Mobile Terminal Emulator (TE), you can access System z (TN3270) or IBM i (TN5250) systems from any device, including iPad, iPhone, Android, and Blackberry—anytime, anywhere.

one server, infinite possibilities.

Our clientless host access solution easily integrates with your web server's security features for encryption and authentication. You can be up and running in minutes, securely connecting the user's devices to your IBM systems.

easy on your admin.

Rocket Mobile TE takes the fear out of BYOD for terminal emulation. With Mobile TE, there is no software to install or component to download. Configuration and security are handled through a single, centralized server, eliminating the need to deal with consumer-oriented app stores, and the license is easily expanded with a simple license key.

Rocket Mobile TE's connectionless HTTPS protocol also means it is more resilient to network issues that are common with cellular and satellite internet services than connection oriented telnet-based protocols.

easy on the eyes.

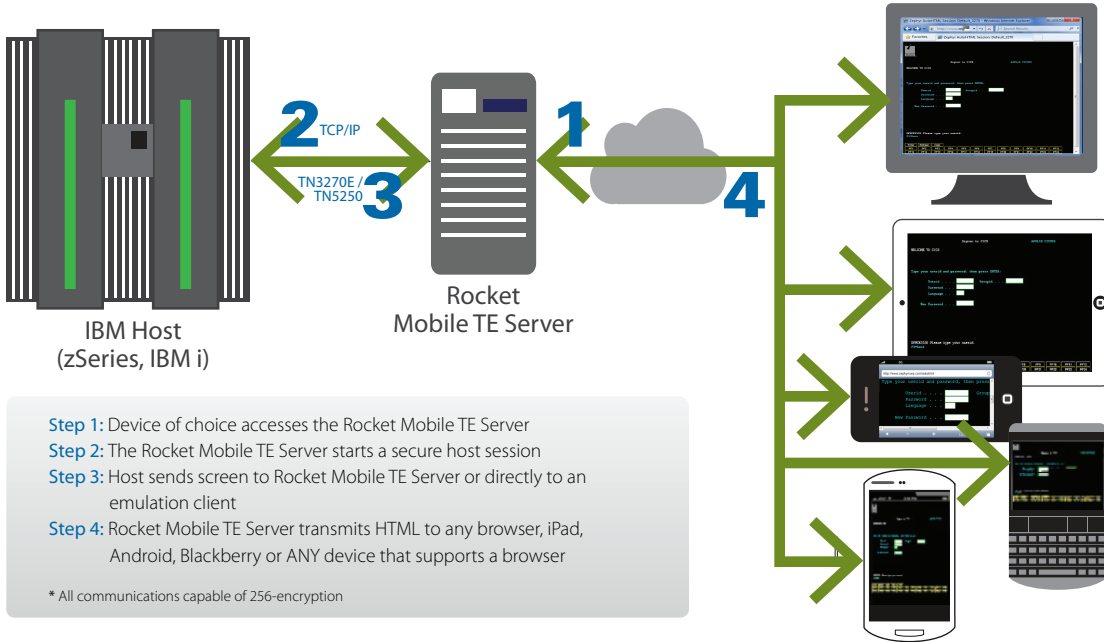

With Mobile TE, you can easily customize your terminal emulator session interface using standard HTML, CSS and JavaScript.

easy money.

Rocket Mobile TE is licensed concurrently, which means you only pay for simultaneous users, instead of paying per installation—saving you money!

not just for mobile.

Because Rocket Mobile TE is clientless and configuration is controlled through a single, centralized server, the same interface works equally well on ANY device with a browser, including ALL smart phones, tablets, eReaders, and standard computer browsers.

what you get.

Rocket Mobile TE provides:

- ❖ The ability to quickly access System z (TN3270) or IBM i(TN5250) systems from any web enabled device, including iPad, iPhone, Android, and Blackberry, or standard computer
- ❖ A true three-tier, clientless solution
- ❖ Concurrent licensing—only pay for simultaneous session and not per device
- ❖ Additional levels of authentication including LDAP/AD integration
- ❖ The ability to customize your terminal emulator session look and feel using standard HTML and CSS
- ❖ The ability to customize your terminal emulator session keyboard behavior using JavaScript

system requirements.

Rocket Mobile TE must have the following system requirements:

supported hosts	<ul style="list-style-type: none"> ❖ IBM System z ❖ IBM i
client requirements	<ul style="list-style-type: none"> ❖ Internet connection ❖ ANY web browser, including Safari, Internet Explorer, Firefox, and Chrome ❖ ANY operating system—Rocket Mobile TE works independently from the OS
server requirements	<ul style="list-style-type: none"> ❖ Microsoft Windows Server 2003 or later with .NET Framework 2.0 or later ❖ Microsoft Internet Information Services (IIS) and ASP.NET ❖ Minimum of 128 MB memory ❖ TCP/IP connection to TN3270, TN5250 server

The number of active sessions is limited by the amount of memory and resources available on your server.
