

DATASHEET

# Rocket Service Packages for Modernization

## Accelerate Your Modernization Project

- Faster return on your investment goals
- Short path to proficiency in modernization techniques, without retooling skills
- Repeatable operating framework for current and future modernization projects
- Maximized use of your Rocket software through user and administrator training by Rocket experts

Organizations worldwide use Rocket® LegaSuite and Rocket® API to unlock data and applications for IBM® i systems and other host-based systems—without recoding or re-platforming. Rocket LegaSuite extends and modernizes the green screens found in many enterprise applications, adding HTML 5-based portability and functionality that goes far beyond the usual “screen scraping.” Rocket API securely exposes in-place applications and programs as RESTful APIs through HTTP interfaces and JSON data interchange format, enabling easy integration with web or mobile applications.

No matter what your goals or level of in-house expertise, Rocket service packages for modernization can help you deliver business value faster. Whether you are meeting a near-term deadline for deploying a web UI, or creating microservices that extend your workflows to mobile devices, you can achieve results more quickly.

Rocket service packages take the time and risk out of buying the right services for your business goals—because our packages are based on proven deliverables across thousands of successful customer engagements. Service packages are matched to your needs—including size of installation, stage (deployment or integration and customization), or resources. Rocket technical consultants are experts in bringing our software to production quickly. We'll help you get your modernization initiative off the ground, and leave you with a foundation to build on far into the future.

We also do custom consulting for customers whose needs don't exactly fit into an existing package. Just ask us for a quote for a custom engagement.

PACKAGE	STAGE	DELIVERABLES
Modernization Launch: Small	Deployment	You'll receive training and mentoring for your staff for Rocket LegaSuite Web and Rocket API. Your staff will work on an actual project, with a self-guided timeline. They'll leave with a framework that scales to more applications and workflows. This solution is targeted to technically advanced teams and/or organizations with limited budgets.
Modernization Launch: Medium	Deployment	You'll receive training and mentoring for your staff for either Rocket LegaSuite Web or Rocket API. Your staff will work live on the solution, with a self-guided project timeline. They'll leave with a framework that scales to more applications and workflows. This is a good solution for technically advanced teams or limited budgets.
UI Modernization: Small	Integration and Customization	This is a turnkey web UI solution for < 1,000 panels, designed to deliver value quickly. Rocket experts deliver a modernization solution for initial rollout. This solution is ideal for customers with limited resources. It includes: <ul style="list-style-type: none"><li>• Best practice web UI design guidance</li><li>• Full migration of existing UI to web UI</li><li>• Infrastructure preparation guidance</li><li>• Testing and QA guidance</li><li>• Deployment assistance</li><li>• Training and mentoring</li></ul>
UI Modernization: Intermediate	Integration and Customization	This is a turnkey web UI solution for < 2,500 panels, designed to deliver value quickly. Rocket experts deliver a modernization solution for initial rollout. This solution is ideal for customers with limited resources. It includes: <ul style="list-style-type: none"><li>• Best practice web UI design guidance</li><li>• Full migration of existing UI to web UI</li><li>• Infrastructure preparation guidance</li><li>• Testing and QA guidance</li><li>• Deployment assistance</li><li>• Training and mentoring</li></ul>
UI Modernization: Medium	Integration and Customization	This is a turnkey web UI solution for < 5,000 panels, designed to deliver value quickly. Rocket experts deliver a modernization solution for initial rollout. This solution is ideal for customers with limited resources. It includes: <ul style="list-style-type: none"><li>• Best practice web UI design guidance</li><li>• Full migration of existing UI to web UI</li><li>• Infrastructure preparation guidance</li><li>• Testing and QA guidance</li><li>• Deployment assistance</li><li>• Training and mentoring</li></ul>
Modernization HealthCheck:	Production	A Rocket expert will assess the health of your LegaSuite implementation in relation to current modernization best practices. He or she will provide recommendations that your team can implement, or the Rocket team can implement at extra cost. The HealthCheck includes: <ul style="list-style-type: none"><li>• Audit of current configuration</li><li>• Gap analysis of current and to-be policies and workflow</li><li>• Recommendations for immediate and long-term improvements</li><li>• Administrator and end-user training reflecting current policies and workflow</li><li>• Discussion covering workflow and configuration improvements</li></ul>

PACKAGE	STAGE	DELIVERABLES
UI Modernization: Large	Integration and Customization	<p>This is a turnkey web UI solution for 5,000 - 10,000 panels, designed to deliver value quickly. Rocket experts deliver a modernization solution for initial rollout. This solution is ideal for customers with limited resources. It includes:</p> <ul style="list-style-type: none"><li>• Best practice web UI design guidance</li><li>• Full migration of existing UI to web UI</li><li>• Infrastructure preparation guidance</li><li>• Testing and QA guidance</li><li>• Deployment assistance</li><li>• Training and mentoring</li></ul>
UI Modernization Enablement: Small	Deployment	<p>This is a web UI solution for &lt; 2,500 panels, designed to engage Rocket's expertise throughout the project, while leveraging your resources for the majority of desired UI panel development. This solution is ideal for customers who are looking for Rocket's best practices guidance, yet want to fully involve their resources in UI panel development. It includes:</p> <ul style="list-style-type: none"><li>• Best practice architecture and web UI design guidance</li><li>• Maximized automated migration of existing UI to web UI</li><li>• Training and mentoring to enable customer team to refine migrated panels as desired</li><li>• Infrastructure preparation guidance</li><li>• Testing and QA guidance</li><li>• Deployment assistance</li></ul>
UI Modernization Enablement: Medium	Deployment	<p>This is a web UI solution for &lt; 5,000 panels, designed to engage Rocket's expertise throughout the project, while leveraging your resources for the majority of desired UI panel development. This solution is ideal for customers who are looking for Rocket's best practices guidance, yet want to fully involve their resources in UI panel development. It includes:</p> <ul style="list-style-type: none"><li>• Best practice architecture and web UI design guidance</li><li>• Maximized automated migration of existing UI to web UI</li><li>• Training and mentoring to enable customer team to refine migrated panels as desired</li><li>• Infrastructure preparation guidance</li><li>• Testing and QA guidance</li><li>• Deployment assistance</li></ul>
UI Modernization Enablement: Large	Deployment	<p>This is a web UI solution for &lt; 10,000 panels, designed to engage Rocket's expertise throughout the project, while leveraging your resources for the majority of desired UI panel development. This solution is ideal for customers who are looking for Rocket's best practices guidance, yet want to fully involve their resources in UI panel development. It includes:</p> <ul style="list-style-type: none"><li>• Best practice architecture and web UI design guidance</li><li>• Maximized automated migration of existing UI to web UI</li><li>• Training and mentoring to enable customer team to refine migrated panels as desired</li><li>• Infrastructure preparation guidance</li><li>• Testing and QA guidance</li><li>• Deployment assistance</li></ul>

PACKAGE	STAGE	DELIVERABLES
UI Modernization Add-On for Integration: Small	Integration and Customization	This is an add-on for UI Modernization that provides UI integration, including: <ul style="list-style-type: none"><li>• UI integration for up to 2 desktop applications</li></ul>
UI Modernization Add-On for Integration: Medium	Integration and Customization	This is an add-on for UI Modernization that provides UI integration, including: <ul style="list-style-type: none"><li>• UI integration for up to 2 desktop applications</li><li>• UI integration for up to 1 Third Party application where technically feasible</li></ul>
API Enablement: Small	Deployment	API enablement tailored to customer requirements, including: <ul style="list-style-type: none"><li>• Best practice API architecture and design</li><li>• Development of 2-3 microflows as templates for customer environment</li><li>• Infrastructure preparation guidance</li><li>• Training and up to 40 hours of mentoring for Rocket API</li></ul>
API Enablement: Medium	Deployment	API enablement tailored to customer requirements, including: <ul style="list-style-type: none"><li>• Best practice API architecture and design</li><li>• Development of 4-5 microflows as templates for customer environment</li><li>• Infrastructure preparation guidance</li><li>• Training and up to 80 hours of mentoring for Rocket API</li></ul>
Modernization Product Upgrade Assistance	Post-integration Deployment	Modernization Product Upgrade Assistance for either Rocket LegaSuite GUI or Rocket API, including: <ul style="list-style-type: none"><li>• Upgrade planning and execution assistance</li><li>• New feature training, including Workbench</li><li>• Remote upgrade and onsite training</li></ul>

Rocket Software ([www.rocketsoftware.com](http://www.rocketsoftware.com)) is a technology company that helps organizations in the IBM ecosystem build solutions that meet today's needs while extending the value of their technology investments for the future. Thousands of companies depend on Rocket to solve their most challenging business problems by helping them run their existing infrastructure and data, as well as extend those assets to take advantage of cloud, mobile, analytics, and other future innovations. Founded in 1990, Rocket is based in Waltham, Massachusetts with locations in Europe, Asia, and Australia.
