Rocket
LEGACY POWERS LEGENDARY

Build Mission Resiliency at Your Government Agency

As we all find ways to adapt to the current crisis, forward-looking government agencies are not only looking to address immediate needs, but also prepare for tomorrow. They need to be stronger than ever, serving their constituents in new and better ways. And they need to improve the scale and security of their operations, so they're ready for any test that may come.
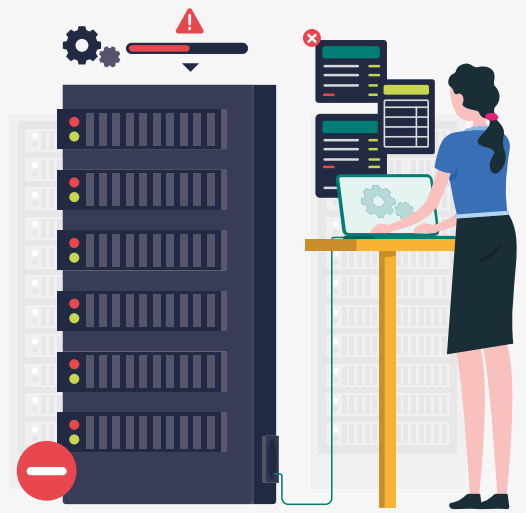

They're building mission resiliency while managing the operational challenges of today. Here's how they're doing it.

1 Meet citizen demand by achieving near limitless scalability and uptime for mission-critical applications that support payment and benefits transactions

☑ **Rocket® z/Trim Operations Analytics**
Scale availability and performance while gaining cost and consumption efficiencies through mainframe transparency and real-time analysis.

☑ **Rocket® Performance Essential**
Improve batch processing performance and reduce I/Os by up to 90% within hours of installing—no manual performance tuning required.

2 Expand your talent pool and enable today's most innovative programmers to deliver intuitive solutions by using modern programming languages

☑ **Rocket® LegaSuite®** and **Rocket® API**
Deliver modern, intuitive user experiences that increase productivity and customer satisfaction using these no-code modernization tools.

☑ **Rocket® Aldon®**
Give your IBM® i developers the ALM and DevOps tools and environments they need to develop innovative applications, while simultaneously providing the process management and compliance reporting needed for today's businesses.

3 Support remote working by quickly and seamlessly enabling call center and service operations

☑ **Rocket® BlueZone® Web**
Improve your user experience with anytime, anywhere remote terminal emulation that delivers a lower total cost of ownership.

You might be surprised to know that in most cases you can accomplish all of the above (and more) without time-consuming and costly replatforming. We can give your organization the tools you need to modernize your existing, trusted IT investments, with Rocket solutions providing an innovation layer that delivers value to your mission in hours, days, or weeks—not months or years.

With Rocket Software, you don't need to replatform to transform.
