

# Transforming Vital Systems

## The Client:

AG Insurance is Belgium's leading life and non-life insurer. With over 4,400 employees, the company focuses on innovation and excellent customer service.

“**Rocket Software** has been a key partner in the transformation of our mission critical systems into a modernized platform, paving the way for seamless innovation and ensuring we remain competitive.”

**PHILIPPE VAN BELLE**, Chief Information and Technology Officer, **AG Insurance**

### CHALLENGE

## COBOL System Dependency

AG Insurance used COBOL systems that limited flexibility, increased costs, and posed challenges for adopting new technologies. **Transitioning to a modern digital platform** was essential for future growth.

- **Aging infrastructure**  
COBOL systems restricted modernization efforts.
- **Cost inefficiencies**  
Outsourced mainframe increased operational costs.
- **Integration challenges**  
Old systems hindered adopting new technologies.

### SOLUTION

## Seamless COBOL migration with Rocket® Enterprise Suite

**01 Open architecture migration**  
Migrated COBOL applications to an open, distributed architecture for flexibility.

**02 API integration**  
Enabled seamless API integration to improve connectivity and functionality.

**03 Containerized services**  
Leveraged containerized services to ensure agility and scalability during the transition.

**04 Operational continuity**  
Ensured uninterrupted operations throughout the migration process for a smooth transition.

### RESULTS

## Cost Savings and Improved Developer Productivity

### Reduced operational costs:

Annual expenses cut by 75%, enabling digital reinvestment.

### Future-ready platform:

Open architecture supports APIs and containerization.

### Improved developer efficiency:

Streamlined tools boosted productivity and satisfaction.
