

Save More with Smart IT

Simplify IT with enterprise solutions

The Client:

FIATC, Spain's second-largest mutual insurer, covers health, life, home, and retirement for individuals and businesses.

“**Rocket Software** and HPE Pointnext have enabled an agile and DevOps-oriented approach for our application lifecycle management. We now use a single development environment for new and existing applications, resulting in faster and simpler delivery of new features to the platform; a true digital transformation.”

– **Jordi de Martín**, CIO, **FIATC**

CHALLENGE

Modernizing a Complex IT Environment

FIATC's IT infrastructure, built over 30 years, consisted of diverse programming languages and databases deployed on IBM mainframes. This created:

- **Complex and costly IT systems**
High-maintenance IT systems drive up costs.
- **Limited insights from siloed data**
Disconnected datasets make analysis tools less effective.
- **Costly modernization demands**
Updating apps while minimizing costs and risks is critical.

SOLUTION

Transforming with Rocket Software and HPE Pointnext

01 Transparent migration

Migrated 30M+ lines of code to Windows, ensuring continuity with minimal risk.

02 Unified development tools

Boosted team collaboration with Rocket Enterprise Developer for one IDE.

03 Improved scalability

Deployed Enterprise Server for improved flexibility and host access.

04 Seamless staff training

Trained the staff to smoothly adopt the new infrastructure.

RESULTS

Cost Reduction and Improved Performance

Strategically reduced operational costs by 70% and boosted efficiency.

Cut batch processing time by 30%, elevating system efficiency and data handling.

Achieved ROI in under 2 years, showcasing strong financial performance.
