Modernization.
Without Disruption.™

Rocket Software powers the world's largest and most innovative companies.

With Rocket Software, you'll experience the power of IT Modernization, Without Disruption. This ethic drives everything we do. It speaks to our commitment to helping businesses modernize their IT systems seamlessly while maintaining stability in their day-to-day operations.

We achieve this by meeting you wherever you are in your modernization journey.

We provide solutions that enable you to protect your systems, optimize your platforms, and leverage data, all while ensuring compliance and security. Whether you're looking to modernize your mainframe or move workloads to the cloud, we're here to help you every step of the way.
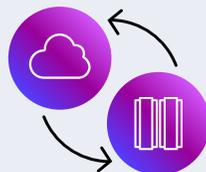

Welcome to **Modernization.** Without Disruption.™
Meeting you where you are in your modernization journey

Data Solutions
All Your Data. All Together.
Rocket's Data Solutions offer the most comprehensive data discovery, integration, and management suite on the market, with unmatched support for mainframe and modern data sources — ensuring seamless integration across all environments.

Hybrid Cloud Solutions
Best of Both.
Leverage intelligent automation and AI-powered solutions for fast, cost-effective paths to hybrid IT infrastructure modernization. Enhance COBOL understanding, streamline mainframe-cloud integration, and generate insights for strategic decisions and improved business resilience across hybrid cloud environments.

Security & Compliance Solutions
De-Risk Modernization.
Achieve complete security, integrity, and resilience of your critical system data through advanced threat detection, automated compliance, and rapid recovery to prevent costly disruptions and align with critical regulations.

Optimizing Skills & Efficiency Solutions
Do Less to do More.
Rocket Optimizing Skills & Efficiency Solutions empower businesses to remove the silo on heritage tech and scale IT to modernize operations and applications, bridge the skills gap, and accelerate agility in a rapidly evolving market.

How We Help Customers Modernize

	Optimize across your platforms	Empower your workforce	Leverage your data	Protect your systems
Solutions that deliver	**Hybrid Cloud Solutions:** Ensuring your infra & apps fully deliver on your needs from Mainframe to Cloud	**Optimizing Skills & Efficiencies Solutions:** Ensuring your team is equipped to maximize success, & gainskills & efficiency	**Data Solutions:** Ensuring your users, customers and AI can safely tap into & utilize business-critical information	**Security & Compliance Solutions:** Ensuring your IT environment is robust, & leverages the latest in security & compliance

Enhanced by AI	Natural Language Explanation	Automated Monitoring	Intelligent Optimization Smart Data Retrieval	Vulnerability Prediction Automated Monitoring

PRODUCT	PRODUCT SOLUTION
AI Predictive Pulse	Enhances Rocket workload automation solutions with AI-driven predictive analytics, ensuring reliable execution across platforms, proactive SLA breach detection, and smarter decision-making with real-time and predictive insights.
API	AAn automation tool that identifies critical, cost-intensive workflows, automates them into RESTful APIs, and enables secure integration with third-party applications
C\Prof	Provide intuitive profiling for CICS applications, helping developers quickly diagnose issues and improve CICS application efficiency and costs.
Catalog Recovery Plus (CR+)	Improves business resiliency through quick recovery of lost or damaged mainframe catalog data, especially in case of catalog corruption or failure.
ChangeMan ZMF	A secure, automated software change and configuration management solution for z/OS that streamlines mainframe development and deployment while ensuring compliance, governance and control.
Cloud Connector (RCC)	Automatically archives mainframe data from virtual tape libraries to chearer on-premises storage appliances or cloud environments.
Cypress Output Management	Manages the creation, distribution, and archiving of business documents, streamlining document workflows across enterprise environments.
DASD Backup Supervisor	Manages and optimizes the backup process of DASD (Direct Access Storage Device) data, helping storage efficiency and fast recovery while reducing resource consumption.
DataEdge	Connects core transactional, distributed, and cloud data to deliver seamless, BI- and AI-ready data access and governance across the enterprise.
Data Intelligence	A self-service data intelligence platform built on automation that spans cloud, distributed, and mainframe infrastructures.
Intelligent Content Services for SAP	Optimizes the SAP environment with seamless and compliant SAP data archiving solutions as you move from ECC6 to S/4HANA.
Rapid Data Recovery	Allows organizations to create point-in-time backups of critical datasets in IBM z/OS environments in the event of data corruption, loss, or system failure.
Data Replicate & Sync (RDRS)	Unlocks data on legacy platforms and ensures consistency across different systems by real-time data replication and synchronization, keeping data accurate and up-to-date.
Data Virtualization (RDV)	Enables access to data from disparate sources in a unified manner without the need for data duplication, improving flexibility and reducing storage requirements.
DevOps (RDOi - IBMi and RDOe - Open Systems)	Enables faster software continuous iteration and continuous deployment/delivery (CI/CD), while enabling organizations to pre-configure and report on how the process adheres to regulatory mandates.
Enterprise Orchestrator	Orchestrates enterprise wide DevOps processes whether in the cloud, distributed systems, IBM i or mainframe environments to improve efficiency and automation.
Enterprise Suite	Accelerates mainframe modernization with advanced application analysis, development, testing and re-platforming solutions, enabling seamless on-prem modernization or application re-platforming for improved efficiency, lower costs and faster time-to-market.
FastAudit	Audits and verifies data integrity quickly, ensuring file system accuracy and identifying potential issues in IBM mainframe environments.
iCluster HA/DR	Delivers high availability and disaster recovery solutions for IBM i systems, ensuring business continuity by replicating data and providing failover capabilities.
MFA for i	Adds Multi-Factor Authentication (MFA) to IBM i systems, enhancing security by requiring additional authentication factors beyond passwords.
Mobius	An enterprise content management solution that unifies information from different systems, helping teams modernize and manage important content, now with GenAI.
Modern Experience (MX)	Modernizes the user interface and experience for mainframe and IBM i applications by enabling back-end control while delivering a more accessible and user-friendly experience on the front end.
Open App Dev for Z (ROAD4Z)	Provides a platform for modern application development on IBM Z, allowing developers to build and deploy new apps using modern open source tools and languages.
Penetration Testing Z	Simulates cyberattacks on mainframe systems to identify security vulnerabilities, helping organizations strengthen defenses and ensure system resilience against potential threats.
Performance Essential (PE)	Optimizes the performance of mainframe batch processing through monitoring, tuning, and resource management to maintain operational efficiency.
PRO/JCL	Automates and enhances job control language (JCL) management for IBM z/OS systems through DevOps integrations and modern interfaces, simplifying the process of writing, analyzing, and maintaining JCL scripts used for batch processing.
Secure Host Access	Provides secure connectivity to critical green screen applications living on mainframes and other host systems.
SmartChat (Gen AI)	Part of Mobius, Smart Chat enables natural language inquiries, helping extract sophisticated insights from policy documents, contracts, regulatory filings, and more — all while ensuring governance and compliance.
TapeCopy	Streamlines mainframe tape data management by enabling efficient tape-to-tape copying, consolidation, and migration, providing enhanced tape storage management for mainframe users.
TMON™ ONE	Combining the power of TMON and TMON PA, provides mainframe system health monitoring with predictive AI for proactive issue identification, and performance analysis for mainframe and distributed systems to optimize resource utilization and application performance.
Visual COBOL	A set of modern development tools for managing and transforming distributed COBOL applications, on-prem or migrated to cloud environments, for improved developer productivty and application efficiency.
Workload Management (Z team)	Automates workload management and job scheduling across mainframe, distributed, IBM i and cloud environments for efficient resource usage, business process optimization and workload balancing and performance.
z/Assure VAP	Enhances mainframe security with precise vulnerability detection (99% accuracy) and actionable reports to safeguard against modern threats.

About Rocket Software

Rocket Software is the global technology leader in modernization and partner of choice that empowers the world's leading businesses on their modernization journeys, spanning core systems to the cloud. Trusted by over 12,500 customers and 750 partners, and with more than 3,000 global employees, Rocket Software enables customers to maximize their data, applications, and infrastructure to deliver critical services that power our modern world. Rocket Software is a privately held U.S. corporation headquartered in the Boston area with centers of excellence strategically located around the world. Rocket Software is a portfolio company of Bain Capital Private Equity. Follow Rocket Software on LinkedIn and X.
