
Additional License Authorizations

For Mainframe ADLM software products

Additional License Authorizations

For Mainframe ADLM software products

This Additional License Authorizations document (“ALA”) set forth the applicable License Options and additional specific software license terms that govern the authorized use of the software products specified below, and are part of the applicable agreement (i.e., Micro Focus End User License Agreement; and/or any separate agreement that grants Licensee a license to such products (e.g., Customer Portfolio Terms or other Master Agreement); and/or Quotation) (the “Applicable Agreement”). Capitalized terms used but not defined herein shall have the meanings set forth in the Applicable Agreement.

Products and Suites covered

Products	E-LTU or E-Media available *	Non-production software class **	Term License Non-production software class (if available)
Advanced Authentication Connector for z/OS***	Yes	Class 2	Class 2
ChangeMan ECP	Yes	Class 2	Class 2
ChangeMan M+R	Yes	Class 2	Class 2
ChangeMan SSM	Yes	Class 2	Class 2
ChangeMan ZMF (all variants)	Yes	Class 2	Class 2
ChangeMan ZMF Client Pack	Yes	Class 2	Class 2
Comparex (all variants)	Yes	Class 2	Class 2
StarTool (all variants)	Yes	Class 2	Class 2

Suites	E-LTU or E-Media available *	Non-production software class **	Term License Non-production software class (if available)
Advanced Authentication Connector for z/OS Bundle	Yes	Class 3	Class 3
Mainframe Suite for IBM Rational Development and Test for System Z***	Yes	Class 2	Class 2

* Any product sold as E-LTU or E-Media shall be delivered electronically regardless of any contrary designation in a purchase order.

** Additional licenses solely for non-production use may be available as specified in the Non-Production Licensing Guide found at software.microfocus.com/legal/software-licensing depending on the non-production software class specified above. Any such non-production licenses will be subject to the Non-Production Licensing Guide and the applicable License Option terms and conditions set forth in this ALA.

Definitions

Capitalized terms not otherwise defined in this ALA document are defined in the governing agreement.

Term	Definition
CEC	Means the Central Electronic Complex, and includes CPUs, memory, channels, controllers, power supplies within the hardware, and direct access storage devices.
Concurrent Users	Means individuals who, at the same point in time, have accessed or used the Licensed Software via any device or other software program, directly or indirectly, regardless of how such access occurs or whether such user uses any hardware or software that reduces the apparent number of users who are using the Licensed Software, such as by using a terminal service. Access or use means the ability to use, copy or

Additional License Authorizations

Term	Definition
	operate the Licensed Software or the loading of any part of the Licensed Software into random access memory (RAM) of a computer.
CPU or Central Processing Unit	Means an individual central processing unit for a computing device that contains a control unit that extracts instructions from memory and decodes and executes the instructions.
E-LTU and E-Media	Means products which are electronically delivered only, and as such any reference to FOB Destination or delivery methods that are stated on your purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.
Licensed Capacity	Means the maximum permitted use of the Licensed Software based on capacity-based pricing metrics identified in the applicable Product Order, including, without limitation, CECs and MIPS.
Licensed Configuration	Means the type of hardware platform, operating system, database, location, and other configuration information identified in the applicable Product Order
MIPS	Means Millions of Instructions Per Second and is an industry rating given to a CEC based upon the CPUs contained within the CEC. MIPS are measured not only by the CEC executing the Licensed Software (the "Executing CEC"), but also any additional CECs that (a) are coupled into or accessing the Executing CEC and (b) have access to a direct access storage device in which the Licensed Software is installed. The number of MIPS attributable to each CEC shall be determined by the then-current Gartner Group Rating Guide or another industry standard selected by Licensor
Named User	Means a single employee of Licensee who has been designated as an authorized user of the Licensed Software and accesses the Licensed Software using a single computer at any given point in time, either directly or through an application.
Platform	Means a hardware chipset (e.g., PA-RISC, Itanium, x86, or SPARC) and operating system (e.g., Windows, Linux, Solaris, AIX, or HP-UX) combination.
Seat	Means a single employee of Licensee who has been authenticated by Licensee's LDAP server and accesses the Licensed Software at any given point in time, either directly or through an application.

License Options

The following License Options are the types of licenses available for a given software product as further specified in this ALA. The applicable License Option for a license shall be as set forth in the Applicable Agreement or Product Order. Those products with only one License Option available shall be governed by such License Option whether or not stated in the Applicable Agreement or Product Order unless otherwise agreed in writing between Licensee and Licensor.

Named User License

Under this License Option, each Named User requires a Named User License which provides Licensee the right to use the Licensed Software by no more than the number of Named Users expressly authorized by Licensor in the applicable Product Order. If an application accessing the Licensed Software is a multiplexing, database, or web portal application that permits users of such application to access the Licensed Software or data processed by the Licensed Software, a separate Named User license will be required for each user of such application.

MIPS or CPU License

The Licensed Capacity for the Licensed Software is as specified in the applicable Product Order. Licensee may not install or use the Licensed Software in CECs with a total MIPS capacity or CPU count that exceeds the Licensed Capacity. This total MIPS capacity or CPU count is based on the total MIPS and/or CPUs within the CECs in which the Licensed Software has been installed and/or is operating, and is not limited to one or more logical partitions or other measure of sub-capacity applicable to the licensed CPUs within the CEC(s). The license granted herein does not permit Licensee to install or use the Licensed Software on a CEC that is coupled within a base or parallel Sysplex environment unless the Licensed Capacity includes the total MIPS capacity of the Sysplex environment. The Licensed Software may only be installed or used in exact conformance with the applicable Licensed Configuration.

Additional License Authorizations

For Mainframe ADLM software products

Licensee shall have the right to use the Licensed Software only on the CECs designated by type, capacity rating, serial number, and location in the applicable Product Order. If the foregoing information is not specified in the applicable Product Order, Licensee shall provide such information to Licensor in writing. Licensee acknowledges that the Licensed Software may contain codes to restrict the use of the Licensed Software to one or more designated CECs.

Licensee may relocate the Licensed Software from one CPU to another CPU, provided that Licensee (a) gives prior written notice to Licensor, including the location and the make, model, and serial numbers of each CPU within the CECs; (b) does not otherwise change the Licensed Configuration or exceed the then-current Licensed Capacity in connection with such relocation; (c) agrees in writing to uninstall and discontinue all use of the Licensed Software with the originally licensed CPU and upon Licensor's request provides a signed written statement of such; and (d) is current on support and maintenance with respect to such relocated Licensed Software.

Seat License

Under this License Option, each Seat requires a Seat License which provides Licensee the right to use the Licensed Software by no more than the number of Seats expressly authorized by Licensor in the applicable Product Order. If an application accessing the Licensed Software is a multiplexing, database, or web portal application that permits users of such application to access the Licensed Software or data processed by the Licensed Software, a separate Seat license will be required for each user of such application. A Seat License is required for each managed administrator of the Licensed Software. Licensee may change from time to time the employees who are designated to use the Licensed Software under a Seat License, provided that the number of users does not exceed the total number of Seat Licenses purchased.

Server License

A Server License permits instantiation of one instance of the Licensed Software on a single machine or server.

Site License

A Site License permits installation and use of the Licensed Software in an unlimited number of CECs with an unlimited total MIPS capacity or CPU count solely at one physical site address. Licensee may relocate the Licensed Software from one physical site address to another, provided that Licensee (a) gives prior written notice to Licensor, including the new physical site address; (b) agrees in writing to uninstall and discontinue all use of the Licensed Software at the prior physical site address and upon Licensor's request provides a signed written statement of such; and (c) is current on support and maintenance with respect to such relocated Licensed Software.

User License

A User License permits Licensee to use the Licensed Software by no more than the number of Concurrent Users for which Licensee has purchased User Licenses.

Additional License Options

The following additional License Options may also apply to one of the License Options above if set forth in the applicable Product Order notwithstanding anything else to the contrary in this ALA:

Third Party Usage License Extension

For a license for which a Third Party Usage License Extension has been purchased, such license can be used by third party contractors of Licensee, notwithstanding any restriction to the contrary in the Applicable Agreement, provided that (1) each such third party is under a written obligation of confidentiality and restrictions of use which provide for protections and limitations of use of the license no less restrictive than the Applicable Agreement, (2) the license will only be used on behalf of Licensee, (3) such use is subject to the terms and conditions of the Applicable Agreement, and (4) Licensee remains liable for any breach by any such third party of the terms of the Applicable Agreement.

For a license for which an Off Continent License Extension has been purchased, such license can be used worldwide, except where prohibited by applicable law, notwithstanding any restriction to the contrary in the Applicable Agreement.

Additional License Authorizations

For Mainframe ADLM software products

Software Specific Terms

Advanced Authentication Connector for z/OS, Advanced Authentication Connector for z/OS Bundle

The following License Options apply: Named User License.

The Licensed Software may not be accessed without a valid license for Micro Focus Advanced Authentication software for no less than the quantity of Named Users licensed for the Licensed Software. This product is part of the Advanced Authentication Connector for z/OS Bundle, but otherwise must be separately purchased by Licensee.

ChangeMan ECP

The following License Options apply: Named User License.

ChangeMan M+R, ChangeMan SSM, ChangeMan ZMF (all variants)

The following License Options apply: MIPS or CPU License, Site License, User License.

ChangeMan ZMF Business User. A license for ChangeMan ZMF Business User can only be used to perform approval and rejection functionality within the Licensed Software.

ChangeMan ZMF Plug-ins. ChangeMan ZMF Plug-ins may only be used with a valid license for ChangeMan ZMF. No support or maintenance is provided or available for these plug-ins except where otherwise agreed by Licensor in writing.

ChangeMan ZMF Client Pack

The following License Options apply: Named User License, MIPS or CPU License, Server License.

With respect to Named User Licenses, a Server License is also required for each CPU accessed by any instance of ChangeMan ZMF that the Licensed Software accesses. Each Named User License of ChangeMan ZMF Client Pack includes one Named User License of ChangeMan ZDD and ChangeMan ZMF for Eclipse.

With respect to MIPS or CPU Licenses, Licensee may use the Licensed Software by any number of Named Users and with no limit to the amount of CPUs that can be accessed by ChangeMan ZMF, provided that the ChangeMan ZMF software that the Licensed Software accesses is not installed or used in CECs with a total MIPS capacity that exceeds the MIPS capacity for the Licensed Software as specified in the applicable Product Order.

Comparex (all variants)

The following License Options apply: MIPS or CPU License, Site License.

Mainframe Suite for IBM Rational Development and Test for System Z

The following License Options apply: Named User License, Seat License.

StarTool (all variants)

The following License Options apply: MIPS or CPU License, Site License.

Suites

Suite	Offering includes
Advanced Authentication Connector for z/OS Bundle	<ul style="list-style-type: none">▪ Advanced Authentication Connector for z/OS▪ Advanced Authentication (one User License for each Named User Bundle license – see ALA for Identity and Access Management Products)▪ Advanced Authentication Clients (one User License for each Named User Bundle license – see ALA for Identity and Access Management Products)
Mainframe Suite for IBM Rational Development and Test for System Z	<ul style="list-style-type: none">▪ ChangeMan SSM▪ ChangeMan ZMF▪ Comparex▪ StarTool DA▪ StarTool FDM▪ StarTool IOO

Additional License Terms

The following additional license terms shall apply to any software governed by this ALA:

Additional License Restrictions

Licensee shall not:

1. Transfer, ship or use the Licensed Software outside the continent in which it was originally licensed to Licensee without first purchasing an Off-Continent License Extension or otherwise paying Licensor any applicable additional fees required by Licensor. For purposes of the foregoing, “continent” shall mean North America, South America, Europe, Africa, Asia, Australia, or Antarctica.
2. Install, access or use the Licensed Software on a Platform, database, location, and other configuration other than the License Configuration for the Licensed Software specified in the applicable Product Order. Additional licenses for use of the Licensed Software on a Platform other than the one set forth in the applicable Product Order may be available upon payment of an additional license fee.

License Keys

The Licensed Software may contain one or more license keys to enable the functionality of the Licensed Software. Licensee may only access and use the Licensed Software with license keys issued by Licensor, and shall not attempt to modify, tamper with, reverse engineer, reverse compile, or disassemble any license key. If Licensor issues a new license key for the Licensed Software, Licensee shall not use the previous license key to enable the Licensed Software. At Licensee’s request, Licensor will reissue a replacement license key to enable the Licensed Software in accordance with the original Product Order, provided that the Licensed Software is then-current on support and maintenance, and Licensee certifies that all evidence of the original license key has been deleted and destroyed and Licensee is in compliance with the Applicable Agreement. Prior to and as a condition to the issuance of any license key by Licensor, or within thirty (30) days of Licensor’s written request (which shall not exceed two requests during any calendar year), Licensee shall provide Licensor with LICTEST output for each LPAR within the CEC(s) in which the Licensed Software is executing, without specifying any PARM in the JCL to verify the system and product information.
