

Rocket® ContentEdge™ Contract Management

Get control of your contracts with intelligent post-signature management

Rocket® ContentEdge™ Contract Management helps organizations centralize, manage, and extract maximum value from contracts and related documents. Optimized for highly regulated sectors that operate on hybrid, full cloud or on-premises environments, ContentEdge Contract Management transforms static contracts into searchable business intelligence, accelerating renewals, ensuring compliance, and managing obligations and risks—all while maintaining enterprise-grade security and governance.

Benefits/Features

01 Enterprise-scale document management

Ingest and organize millions of contracts and related documents efficiently, ideal for large-scale contract portfolios.

02 Safety-first, AI-powered intelligence

Leverage AI for contract search, extraction, identify risks, and surface revenue opportunities buried in contract language—without manual review.

03 Contract obligation management

Automated workflows for renewals process and obligation management reduce manual labor costs and ensure that renewals happen in a timely fashion.

04 Mitigate organizational risk

Ensure compliance with comprehensive audit trails, version control, and access management. Avoid penalties and protect sensitive information.

05 Seamless system integration

Connect contract data with business systems like Salesforce® and SAP® through native integrations, creating a unified view of contractual obligations across your organization.

06 Cost-effective contract management

Get superior post-signature contract administration functionality without the expense and complexity of full CLM systems.

Alisa de Dominicis,
Senior Director, Legal Operations,
Rocket Software

During a major acquisition, we faced the daunting task of reviewing millions of documents – everything from contracts, order forms, invoices and other critical information – from the acquired company under significant time pressure. The AI capabilities of Rocket ContentEdge enabled us to streamline the review process through automated search and extraction while still adhering to access controls and permissions. As a result, we saw an 80% improvement in the time it takes to find documents and access key information. In the end, what would have taken us years to review was reduced to months with ContentEdge, enabling us to move forward with confidence and efficiency.”

With Rocket ContentEdge Contract Management, you can:

01 Centralize contract repositories

Bring order to scattered contracts across departments, acquired companies, and legacy systems into one governed, searchable location.

02 Protect sensitive information

Maintain regulatory compliance and audit readiness with enterprise-grade security controls and fine-grained access policies.

03 Streamline M&A integration

Rapidly catalog and organize inherited contracts from acquisitions, accelerating integration timelines.

04 Automate risk assessment

Identify unusual clauses, non-standard language, and potential business risks through AI-powered analysis—no manual review required.

05 Drive business value

Transform static documents into actionable insights that reveal revenue opportunities, cost savings, and strategic advantages.

06 Ensure compliance at scale

Honor existing governance policies while leveraging modern AI tools to enhance productivity and reduce compliance risks.
