Rocket software

Rocket® ContentEdge™

Unlock maximum value from unstructured data

Rocket® ContentEdge™ enables safe, governed, in-place access to protected unstructured information. It helps organizations unlock the value of unstructured data and accelerate data modernization at scale. Built for hybrid environments, ContentEdge enables safe generative AI (GenAI), intelligent automation, and governed access to enterprise content across cloud, on-premises, and mainframe environments while maintaining business continuity.

Benefits/Features

01 Safety-first GenAI

Confidently apply GenAI to sensitive content with built-in redaction and reuse of existing access controls, helping manage cost through intelligent optimization.

02 In-place data access

Connect to existing data sources to leverage modern AI for immediate answers and analytics without the added risk, cost, or security exposure of moving data.

03 Ecosystem accelerators

Gain faster discovery and insight with native integrations for platforms such as SAP®, Microsoft 365®, and SharePoint®.

04 Unified data convergence

Automatically merge unstructured information into existing structured data analytics solutions via open standards while maintaining system-of-record controls.

05 Automated discovery

Deliver enterprise-wide data views via automation, moving quickly from discovery to deployment for data access, integrations, and analytics.

06 Hybrid modernization

Modernize at your pace across cloud, on-premises, and mainframe environments to reduce risk and cost while unlocking new value.

//

From the perspective of a financial institution, obtaining insights from operational information is important. ContentEdge enables us to locate information, unlock intelligence, and drive efficiencies from critical documents."

AgFirst Farm Credit Bank

With Rocket ContentEdge, you can:

01 Safely operationalize AI

Use built-in redaction and existing access controls to apply GenAI to sensitive content while helping maintain compliance and privacy protocols.

02 Bridge the gap between content and analysis

Merge unstructured information into your structured data analytics solutions to create a more complete operational view.

03 Accelerate modernization securely

Connect to data where it lives: on-premises, in the cloud, or on the mainframe, reducing the need for complex and risky data migration.

04 Speed up decision-making

Empower teams with immediate answers and analytics by uncovering hidden insights within operational information.

05 Maintain trust and control

Honor existing compliance policies and security controls while leveraging modern tools to enhance employee productivity and customer experience.

06 Reduce cost and risk

Eliminate unnecessary data duplication and movement, manage costs through intelligent optimization, and reduce the risks associated with data handling.

By the numbers:

Only **one-third** of unstructured content & data is governed.

60% of today's corporate data is unstructured.

2.5 quintillion bytes of data are generated daily worldwide.

Over **10 million** global IT & business professionals trust Rocket Software.

Rocket® software

Modernization. **Without Disruption.**™
