

Modernizing Banking with Rocket® Enterprise Suite

Streamline operations, reduce costs, and deliver exceptional banking services.

Modernizing with Rocket® Enterprise Suite gives the tools banks need to improve efficiency, stay agile, and drive innovation. **Here's what you can achieve with modernized core systems:**

01 Preserve institutional knowledge

Document and centralize business logic so teams aren't reliant on a handful of specialists.

02 Control total cost of ownership (TCO)

Optimize mainframe costs to support high transaction volumes without driving up expenses.

03 Bring AI into your workflows

Connect previously siloed systems to modern, cloud-native AI tools to power innovation and automate decision-making.

04 Release features faster

Roll out new features and updates in days, not months.

What gets better with modernized banking?

01 Checks processing and clearing

Streamlined check processing enables faster, more accurate clearing while reducing the need for manual intervention.

02 Loan origination and servicing

Simplified loan process accelerates application-to-approval timelines and improves the borrower experience.

03 Wire transfers and payments

Modern payment infrastructure processes high transaction volumes quickly and reliably while maintaining precision and control.

04 Account opening and onboarding

Digital-first onboarding opens accounts faster, reduces drop-offs, and gives customers a great first impression.

Success stories you can bank on
