

Reducing IT Costs Through Strategic Modernization

Streamlining operations and improving efficiency with [Rocket® Enterprise Suite*](#)

CHALLENGE

Outdated systems driving up maintenance costs

The organization faced mounting pressure to synchronize business goals with its IT strategy. **The team needed to boost operational efficiency and significantly lower costs.** The path forward was complex, requiring a flexible, virtualized development environment.

- **Fragmented processes**

To support future growth, the organization needed to unify its processes and data within a flexible, virtualized development environment.

- **High maintenance costs**

Outdated systems increased operational costs and slowed performance, requiring a full modernization to align IT with business goals.

- **End-user transparency**

The organization had to modernize its core systems without disrupting third-party applications that exchanged data with them.

SOLUTION

A phased approach with Rocket® Enterprise Suite

01 Seamless migration

Over 4,000 applications were migrated to a new server environment in just over a year, preserving all business logic and database structures to minimize risk.

03 Simplified functionality

Modernization streamlined the integration of XML/JSON file management, web services, and direct web publishing into daily workflows.

02 Zero disruption

Retaining existing structures allowed IT operations to continue without interruption, ensuring a smooth user adoption process.

04 Enhanced deployment

The team can now efficiently roll out applications to any platform, reducing costs and preparing for future innovation.

RESULTS

Cost efficiency and modernized deployment

90% cost reduction

Existing application functions were preserved, saving money.

Faster innovation

Modernized development simplified new feature integration.

Minimized project risk

Retained business logic across 4,000 applications seamlessly.
