

Seamless Hybrid Cloud Move

Maintain document access during hybrid cloud migration with Rocket® Mobius®

CLIENT

Kawasaki Motors Corp. distributes motorcycles, ATVs, and more via 1,100 retailers, employing 3,100+ people across the U.S.

“As we embarked on a hybrid cloud migration, it was critical for us to ensure no content was lost in the process. Working with Rocket Software gave us the continuity, experience, and tools to ensure there were little to no disruptions every step of the way.”

Tom Fox, Infrastructure and Operations, **Kawasaki Motors Corp., U.S.A.**

CHALLENGE

Mainframe exit strategy

Kawasaki **faced a new business strategy, rising costs, and a skills gap, requiring a mainframe exit and hybrid cloud migration.** They needed to move two decades of data under tight timelines and limited staff while ensuring continuity.

- **Complex migration**
Needed to move two decades of critical data.
- **Resource limitations**
Project had a tight timeline and limited staff.
- **Business continuity**
Daily operations needed to continue without interruption.

SOLUTION

Continuity through modernization with Rocket Mobius

01 Maintain continuity
Leveraged existing Rocket Mobius architecture to avoid outage periods during the migration.

02 Modern UI/UX
Transitioned to Rocket Mobius View, enabling cloud operation with a modern interface.

03 Seamless access
Users could access past and present documents without workflow changes or interruptions.

04 Data preservation
Ensured countless PDFs, data, and other documents remained secure and accessible.

RESULTS

Successful migration and uninterrupted operations

Cost savings

Avoided data reprocessing costs from on-premises to cloud.

Operational consistency

Business users experienced minimal disruption to daily operations.

Improved accessibility

Mission-critical documents remained available without disruption.
