

Streamlining Invoicing at Scale

Merging data for a full view and faster decisions with Rocket® Verastream® Host Integrator*

CLIENT

Lab Logistics Group is a cooperative of 36 laboratory dealers. It connects distributors and equipment manufacturers, offering centralized purchasing, logistics, and IT support.

“ Our business is growing fast, and Verastream is essential to our ability to scale. We aim to fully automate processing to at least 40% of our invoices, resulting in increased efficiency and faster delivery.”

Marcus Robichon, IT Manager, **Lab Logistics Group GmbH**

CHALLENGE

Streamline manual workflows

The company’s text-based **Enterprise Resource Planning (ERP) system relied on manual data entry, creating significant bottlenecks.** Three employees processed 3,500 invoices monthly, making the process time-consuming and prone to errors.

- **Intensive paperwork process**
Thousands of multi-page invoices entered by hand.
- **Hindered remote work**
Employees couldn’t easily connect to the ERP system remotely.
- **Prone to human error**
Manual data entry across systems led to mistakes.

SOLUTION

Automated workflows with Rocket® Verastream® Host Integrator

01 Automated invoice processing
Modeled the invoicing system to streamline workflows.

03 Merged data from systems
Provided a full overview without switching between systems.

02 Focused on exceptions
Verastream flags exceptions for the finance team to review.

04 Enabled remote access
Web services allow employees to connect from anywhere.

RESULTS

Achieved greater efficiency and scalability

Eliminated manual data entry

Automated 3,500 monthly invoices, removing the need for manual input.

Accelerated decision-making

Delivered a comprehensive overview of supplier history for better-informed decisions.

Seamless remote access

Employees can now securely connect to the ERP system from anywhere using web services.
