Modern DevOps: Stop Fighting Friction and Start Building Faster with DevEx

What if you could cut deployment errors in half? Imagine what that would do for your roadmap.
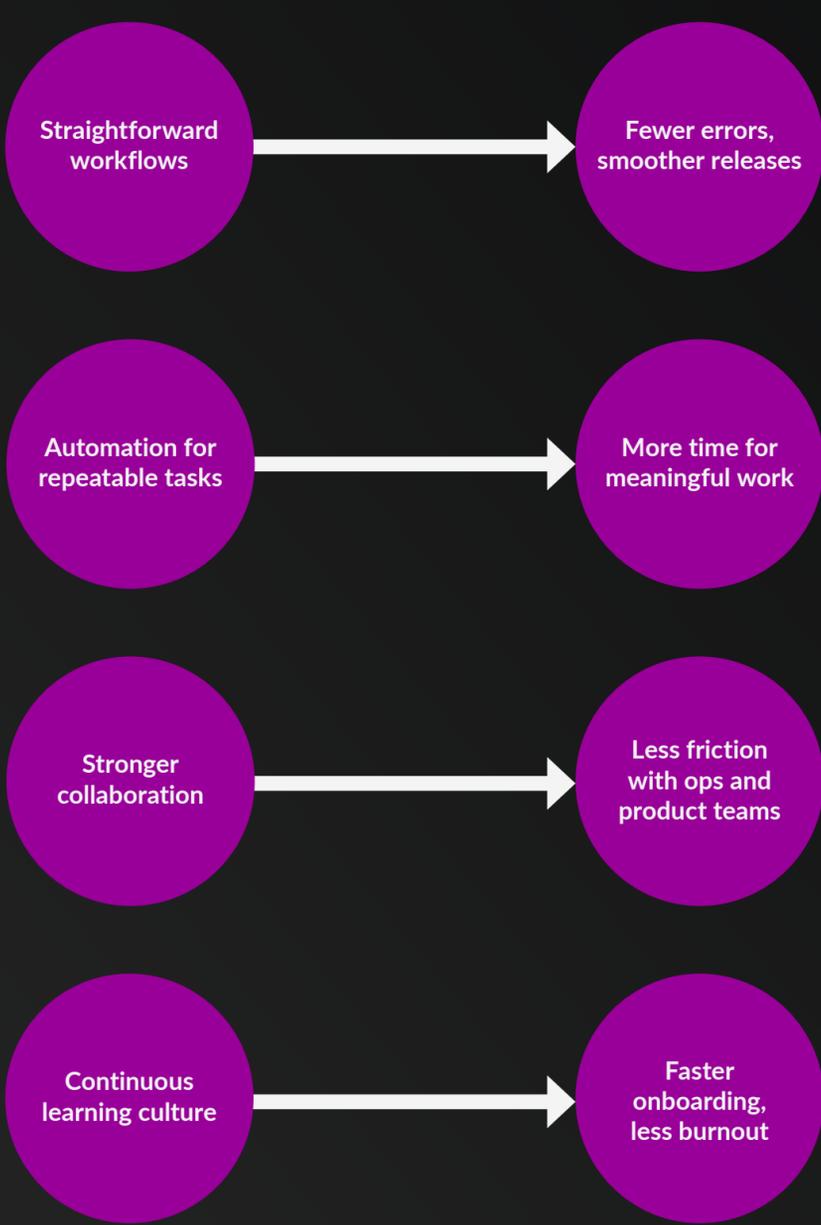

The challenges holding back your growth

61%

of developers are losing more than 10 hours a week to inefficiencies.*

67%

have left jobs (or know someone who has) because of repeated deployment errors.†

4 months

Deployments run an average of **four months behind schedule.**‡

1/4

1 out of 4 developers says context switching is the most challenging part of their job. ††

* Atlassian, † WorkLife Article, ‡ ITPro Article, †† JetBrains Dev Survey

The fix: A streamlined experience

Straightforward workflows → Fewer errors, smoother releases

Automation for repeatable tasks → More time for meaningful work

Stronger collaboration → Less friction with ops and product teams

Continuous learning culture → Faster onboarding, less burnout

The impact of great DevEx

Teams that focus on platform engineering (an approach to DevEx) found **10% higher levels of team performance.**§

Improving developer experiences can **reduce the costs of end-to-end software delivery by over 15% YoY.****

Lower turnover: Replacing one senior engineer can cost up to 2x their salary (SHRM).‡‡
