

Rocket® Mainstar® Backup and Recovery Manager Suite for z/OS®

Simplify z/OS backup, recovery, and disaster recovery operations

Rocket® Mainstar® Backup and Recovery Manager Suite provides assurance that data assets required for an organization to be resilient are protected and recoverable in any situation. Ensuring that your business is resilient to every type of outage can be a daunting task. With Backup and Recovery Manager Suite, you can quickly restore access to data and meet your demands for continuous data availability.

Benefits/Features

Discover critical data assets

Easily identify data that makes up an application – and the data that is required by an application to recover.

Prove recovery compliance

Survive a data backup audit by providing critical data asset lists that prove compliance.

Prioritize critical data recovery

Prioritize group data backups according to business priorities for a tiered recovery and restore only needed data from a central location.

Filter data sets

Exclude data sets you don't want every application to back up, or that you want to back up collectively.

Centralize viewing, reporting

Centrally view and report on backup information with rapid and effective access.

Automatically track changes

Continually evaluate applications, capturing any changes.

With Mainstar Backup and Recovery Manager you can:

Optimize resources

Eliminate redundant backups that waste valuable resources and increase backup and recovery times by identifying mission-critical data.

Improve data visibility

Centralize visibility into the entire backup environment.

Reduce the impact of accidents

Mitigate the risk of financial losses due to missing or corrupted data.

Improve storage admin productivity

Simplify application data asset discovery and prioritize mission-critical data recovery with filtering and masking.

Improve compliance

Demonstrate compliance with internal or government regulations with ease.

Increase storage management agility

Leverage automation and other smart capabilities to reduce manual and excess effort with backup and recovery.

Why partner with Rocket Software?

1

Reduce backup time by 40%-60% and speed disaster recovery.

2

Demonstrate compliance with ease.

3

Simplify z/OS data backup and recovery with smart features and automation.

4

Prioritize z/OS mission-critical data backup and recovery.

The future won't wait—modernize today.
