ASSESS YOUR SERVER INFRASTRUCTURE'S CAPABILITY WITH QUANTIFIABLE MEASUREMENTS

ASG-TMON Performance Analyzer

MAKE THE MOST OF YOUR INFRASTRUCTURE

Boost your IT services, lower costs and gain insights that allow your data center professionals to make confident decisions by leveraging ASG Technologies' experience in IT infrastructure management and proven cross-platform solutions. For many years, ASG has been dedicated to providing efficient IT capacity planning solutions for the most demanding and successful IT infrastructures.

ASG offers TMON Performance Analyzer, a solution that takes the guesswork out of your planning and decision-making, allowing you to create reliable expectations, communicate accurate and actionable information, and align business objectives with IT performance.

HOW WE DO IT

ASG will collect one business month of both physical and virtual performance and capacity utilization data from across the enterprise, or a subset defined by the customer. This data will then be automatically analyzed and reports will be produced and presented. From these reports, any problem areas can be identified and an assessment can be made that leads to proposals for possible improvements.

Day 1
- Setup, timeline, deliverables
- Identify the target environment(s) and required resources

Day 2
- Installation and implementation of ASG-TMON Performance Analyzer
- Setup data gathering

After 30 days
- Analysis of the collected data
- Presentation of outcome and recommendations

IT AND BUSINESS GOALS

- IT competency through comprehensive capacity planning
- Proactive problem avoidance
- Better information leads to better decisions
- Reduce the guesswork
- Improved communication within the organization
- Clarity on business cycle impacts on server resources
- Greener

WHAT WILL BE PROVIDED?

A complete implementation of ASG-TMON Performance Analyzer which will collect key resource-consumption metrics from your server environment for up to 30 days. The collected data will be analyzed and reports will provide:

- Analysis of your organization's IT server infrastructure usage
- Identification of over- and underutilized resources
- Highlights of specific resource limitations
