

Rocket® Zena™

Optimize operational business flows across platforms

As IT environments grow more complex across hybrid infrastructures, operations teams face the challenge of managing thousands of workloads and executing hundreds of business processes accurately and on time. Meet Rocket Zena™: a cutting-edge, multi-platform workload automation solution that simplifies IT operations. It enables teams to design, visualize, and automate IT processes seamlessly from a single console, optimizing operations from mainframe to cloud. Rocket Zena™ cuts costs and enhances efficiency by integrating with key applications, ensuring smooth cross-platform automation.

Upgrade your automation with the Rocket AI Predictive Pulse add-on. Enhance Zena's capabilities through proactive decision-making and strategy recommendations. Prevent errors, delays, or missed SLAs, ensuring your operations remain seamless and ahead of the curve.

Benefits/Features

Manage Production Statistics and Reports

Simplify monitoring and intervention with customizable dashboards. Use drill-down capability to navigate directly to problem areas so you can take action quickly.

Maximize Workload Automation Flexibility

Rocket Zena™ features a graphical process whiteboard for task definition. This component-based architecture minimizes redundant definitions and maximizes flexibility.

Integrate with Ease and at Scale

Rocket Zena™ enables workload management on multiple platforms, including support for Docker deployment. It seamlessly integrates application development and server environments, eliminating manual scripting of existing applications with newer technologies—greatly reducing costs.

Centralize Scheduling Management

Rocket Zena™ enables you to manage distributed scheduling through a centralized console with dashboard capabilities, including predefined as well as user-customizable views and reports to meet individual user needs.

What our customers have to say

Zena saved our team valuable time and allowed us to focus more on customer satisfaction."

MARCELO CANTANHEDE
Executive Manager of IT Services and Governance,
BrasilCap

With Rocket Zena you can:

Improve Operational Excellence

Optimize business process flows with advanced workload automation.

Ensure High Process Completion

Automate complex processes for predictable operations to be reliable, repeatable, and error-free.

Reduce Operational Complexity

Simplify the management of complex cross-platform processes and hybrid IT environments.

Automate Decisioning and Recommendations

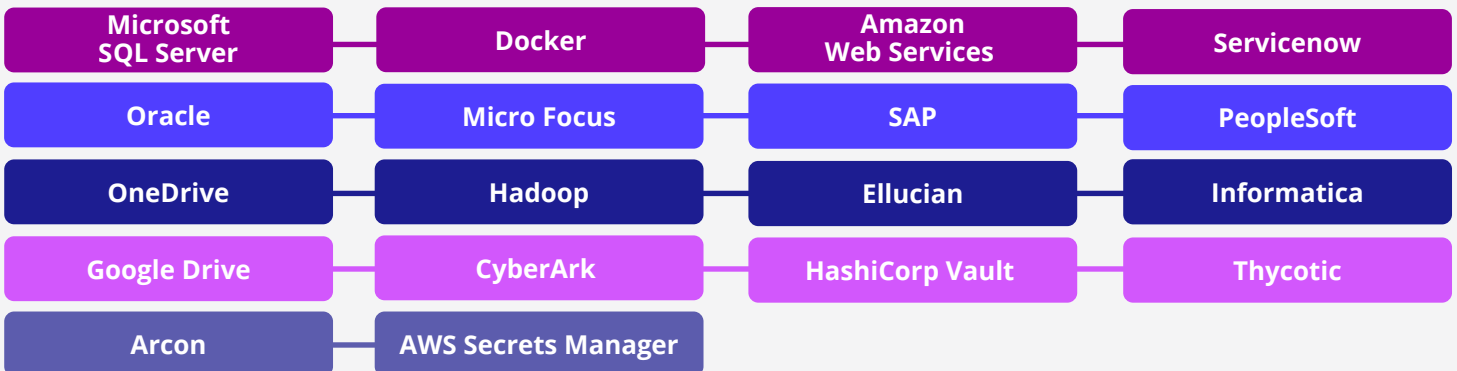

With the Rocket AI Predictive Pulse add-on, Rocket Zena enables you to get a constant pulse on your workload automation initiatives through predictive intelligent analytics that can prevent human errors, delays, and missed SLA's.

Increase Productivity, Scalability

Define processes and tasks once, execute infinitely, and free up staff to focus on value-added work.

Rocket® Zena connects your application to your workflows

Modernization. Without Disruption.™
