

# Rocket® MFA (IBM® i Edition)

Improve security and compliance while safeguarding data environments for future innovation

Modernizing your IBM® i applications and data has led to better digital experiences and the extension of those applications to web, mobile, and cloud environments. However, these same conveniences have also placed your organization at risk of cyber threats and security breaches. Running network-level protection does not provide the comprehensive coverage you need to secure your IBM i. A valid user inside your network, clicking on an embedded hotlink, is only one example of how a threat can jeopardize the access and security of critical business systems.

## Benefits/Features

### Comprehensive security

End-to-end policy-based MFA and single sign-on (SSO) for IBM i.

### Dynamic password protection

Multifactor authentication tokens on both the operating system and application layers.

### Flexible deployment

Across on-premises, cloud, and hybrid environments that contain mission-critical IBM i data and applications.

### Centralized management

Easily set up users and manage permissions in the Rocket MFA portal.

### Broad support

Authenticate across numerous security methods and protocols, including RSA SecurID RADIUS, LDAP, TOTP, or Yubico OTP.

## With Rocket MFA (IBM i Edition), you can:

### Create

A secure but scalable environment where innovation can thrive.

### Ensure

The applications and services hosted on those environments remain easily accessible to employees and customers.

### Comply

With stringent data regulations and align with security best practices.

### Extend

The lifetime utility of your IBM i infrastructure and secure your organization's ability to provide cutting-edge, innovative digital experiences.

### Integrate

Seamlessly with Rocket® Terminal Emulator, Rocket® Modern Experience, and more, allowing you to effortlessly extend MFA security across your Rocket products.

### Gain

More flexibility in your security deployment strategy by building web services to extend MFA authentication where needed.

## Protect against risks with Rocket Software:

37%

OF BREACHES  
USED OR STOLE  
USER CREDENTIALS

22%

INVOLVED IN SOCIAL  
ENGINEERED ATTACKS,  
LIKE PHISHING

17%

USED SUBTLE  
MALWARE ATTACKS,  
LIKE KEYLOGGERS

## The future won't wait—modernize today.
