

GAIN KNOWLEDGE & TRAINING TO ENSURE A SUCCESSFUL METADATA IMPLEMENTATION AND GENERATE FASTER RESULTS AND BENEFITS

ASG Data Intelligence Metadata Repository Basic Training

IT AND BUSINESS GOALS

To gain maximum value from the investments organizations have made in enterprise-wide software in the fastest possible time, it is essential that key metadata management personnel have sufficient information to correctly plan, configure/customise, implement, deploy and fully utilise the solution.

Having familiarity with the basic capabilities of the product(s) and the proposed solution will help to ensure that implementations stay on course.

Further, the training will help the metadata management team set correct expectations with the potential user communities and provide the guidance to achieve those goals.

This course is relevant to the needs of these users: the metadata management team, repository administrators and infrastructure support staff.

INCLUDED IN YOUR SERVICE

This package provides comprehensive foundation knowledge to clients that are about to embark on the implementation of ASG Data Intelligence Metadata Repository and ASG Business Glossary.

This training will also provide the foundation for understanding the overall solution implemented at the client site before new members of the team can administer and make correct changes to the existing solution.

RESULTS YOU CAN EXPECT

At the end of this course, team members will be able to perform day-to-day activities to administer and configure the client's ASG Data Intelligence Metadata Repository Environment.

It will also help lay the foundation for the next step of implementation planning for short- and long-term repository deployment.

- Optimize the use of ASG's technology across the enterprise
- Decrease client's investment in remedial learning activities

The primary objectives of ASG's Professional Services Courses are to assist clients in achieving self-sufficient and productive use of ASG solutions.
