

## Rocket Aldon Lifecycle Manager (IBM i Edition) Administrator Training Outline

This is a typical agenda for Rocket Aldon LMi, hereafter referred to as Aldon LMi, administrator training. The objective of the training is to ensure that the Aldon LMi administrator gains the knowledge required to maintain the Aldon LMi application environment and effectively address topics as they arise. The Rocket Consultant will educate the administrator on best practices for application lifecycle change management and how they are reflected in your Aldon LMi environment. Prior to the training session, the Rocket Consultant will work with your team to prioritize topics according to your interests. The Rocket Consultant will also review your organization's architecture and application lifecycle so that the training is tailored accordingly.
