

Rocket® C\Prof

Intuitive transaction profiling
for IBM® CICS®

Diagnose faster with minimal impact

Reproducing a problem and identifying solutions with existing tools can be tedious, time consuming, and expensive. Rocket® C\Prof helps organizations get more business and operational value from IBM® CICS® internal trace data while it protects your IBM® z/OS® mainframe environment. Whether you're an application developer, systems programmer, support person, project lead, tester, or analyst, Rocket C\Prof provides the added details you need to diagnose problems in your CICS applications faster—with minimal impact on your business-critical applications.

Benefits/Features

Pinpoint CICS transactions

Select transactions based on your criteria; for example, transaction name and response time.

Organize CICS transactions

Sift through millions of transactions with powerful find, filter, save, and sort capabilities.

Identify and measure

Identify all the programs used by a transaction, as well as the performance profile of each program.

Map program flows

Follow the program flow across multiple CICS regions.

Review application calls

Review all the application calls made by each program—including EXEC CICS as well as Db2®, JCIICS, MQ, and IMS—in rich detail and with elapsed time analysis.

Identify and analyze issues

Dive deep into the trace events associated with each transaction or application call in order to identify the cause of a delay or problem.

What our customers have to say

Without C\Prof, we may never have identified a major trace transaction error, and if so, would not have found the fix as quickly to realize our true cost-savings.”

LARGE FINANCIAL COMPANY

With Rocket C\Prof you can:

Save valuable time

Spend less time sorting through diagnostic data and more time solving problems.

Remove productivity barriers

C\Prof is intuitive and easy to use, and it provides value to staff across a range of roles and responsibilities.

Minimize CICS resource drain

Run C\Prof outside of the CICS address space, with no required changes to CICS itself.

Save time analyzing

Capture problems as they occur and reduce the need to reproduce them.

Why partner with Rocket Software?

Acceleration.

Improve application response times by twofold.

Productivity.

Improve CICS region throughput and run more workloads.

Optimization.

Completely replace the CICS Auxiliary Trace.

The future won't wait—modernize today.
