The Rocket® MultiValue Performance Experience (MVX: Performance) is a system monitoring tool for Rocket UniVerse that helps you identify and escalate performance-impacting events specific to Rocket UniVerse. Escalated events also include guidance on possible resolutions along with data snapshots, allowing you to easily track and address the source of an issue.

Benefits/Features

**Quickly Address Performance Issues**
MVX: Performance looks at several sources to help DBAs identify and evaluate issues, even complex or hidden ones, plus provides resolution guidance.

**Maximize Rocket UniVerse Availability**
DBAs can rely on the dashboard and alerts to monitor license usage, record locks, and database process resource usage.

**Mission Control for Rocket UniVerse**
MVX: Performance monitors Rocket UniVerse metrics as well as operating system metrics, and the dashboard provides a single view into event flow.

**Avoid licensing bottlenecks**
“License Limit Warning” alerts let you know immediately if the number of authorized licenses is nearing its maximum number of users.
What our customers have to say

Rocket Software’s MultiValue Performance Experience for UniVerse provides proactive awareness of important performance-impacting issues that affect the stability of mission-critical applications where downtime is not an option, including valuable insights so we can quickly pinpoint and address these issues.”

HENRY UNGER
President,
Pulsiam

With MVX: Performance you can:

- **Address performance issues quickly**
  Monitor multiple serial numbers – Cloud-based and on-prem UniVerse instances – from one screen.

- **Prevent system slowdown**
  Numerous record/table lock alerts ensure thresholds are not exceeded.

- **Focus on business**
  The notification engine and email alerts eliminate the need for a person to sit in front of a screen while monitoring.

- **Improve user experience**
  Monitoring, notification, and proactive measures ensure UniVerse runs at a maximum level.

**MultiValue Performance Experience Monitors**

- 20+ performance-impacting events
- User sessions
- Record and group locks
- Reporting

The future won’t wait—modernize today.
