

# Rocket® Process Insights

## End-to-end deep visibility into IBM® i workflows and applications

To remain productive and competitive, fast-growing organizations are modernizing their IBM® i applications. The initial challenge, however, is knowing where to start. In-depth visibility into workflows and data processes hidden behind IBM i application green screens is needed to understand better how they are utilized, how they should be optimized, or where improvements in UI and automation will provide the most significant value. Rocket® Process Insights is a visualization solution that gives you the clarity you need to overcome this ambiguity and build traction towards full IBM i modernization and optimization.

### Benefits/Features

#### Visualize end-to-end workflows

Obtain clear visibility into every green-screen data process and workflow through Rocket Process Insights (no RPG expertise required). Rocket Process Insights generates heat maps that reveal commonly accessed datasets, workflows, and instances showing how the business engages with each IBM i application.

#### Ensure quality user experience with modern UI

Rocket Process Insights heat maps provide valuable guidance on where to direct efforts to improve user experience. Go straight into execution with your UX modernization tool (i.e., Rocket® Modern Experience) to transform green screens into modern interfaces, so your organization remains responsive and agile to market and customer needs.

#### Prioritize high-value IBM i workflows

Leverage heat map data from Rocket Process Insights to align and prioritize modernization efforts across your organization. Build a strategic and data-driven modernization plan with no guesswork, prioritizing investment in high-impact workflows that have a significant bearing on future productivity and user experience of your IBM i application to increase its value to the business.

#### Streamline workflows through automation

With end-to-end visibility of your IBM i workflows achieved through Rocket Process Insights, your business can make the seamless implementation of APIs the cornerstone of your smart modernization efforts. With a simple click of a button, Rocket Process insights can trigger the creation of APIs informed by your IBM i workflows' data and seamlessly connect to a low-code automation tool like Rocket® Process Automation (IBM i Edition), which allows you to eliminate manual and repetitive processes with ease, improving productivity, and increased savings.

## With Rocket Process Insights, you can:

### Initiate a data-driven modernization plan

Track and analyze every data interaction or workflow utilization within every IBM i application to understand what's mission-critical for your organization.

### Prioritize Decisions and Investment

Leveraging heat map data helps prioritize investment in high-impact workflows that have a significant bearing on the future productivity and user experience of your IBM i application.

### Eliminate the lag between discovery and automation

Rocket Process Insights can easily trigger the creation of APIs informed by your IBM i workflows' data with a simple "click of a button," saving you time and money.

### Bypass IBM i RPG expertise

Rocket Process Insights can be used by analysts and developers regardless of their knowledge of IBM i RPG.

## Experience Rocket® Intelligent Legacy Automation

Rocket® Intelligent Legacy Automation (Rocket® ILA) and its family of products, Rocket® Process Insights, Rocket® Process Automation, and Rocket® Process Integration, bring intuitive, low-code automation to thousands of IBM i workflows, applications, and sessions. Rocket® ILA provides the clarity and tools needed to overcome ambiguity and build traction towards full IBM i modernization and optimization.

## The future won't wait—modernize today.
