

Rocket® Software at a Glance

As experts in IBM® Z, IBM® Power, and database and connectivity solutions, we help customers get more from the technology and data they have today, so they can innovate for tomorrow.

We help organizations take advantage of the latest technologies using their legacy platforms. Our solutions are helping customers develop for the latest user experiences, use predictive analytics with deep data, develop AI and machine learning capabilities, design mobile and browser applications, and more.

What we build

We are experts in helping our customers maximize their investment in their legacy platforms. We are also leaders in the development of open source languages and tools for IBM Z, making it easier for developers to use modern languages like Python and Perl to code on the mainframe.

Platforms we support	Areas of expertise	How we help
 IBM Z	 Application	 Operate
 IBM Power Systems	 Data	 Optimize
 Embedded databases	 Infrastructure & security	 Modernize & automate

// Our modernization strategy was always centered around leveraging our mainframe data stores and decades of development. Rocket's collaboration has been a major asset in finding tactical solutions and ensuring success through each stage of execution. **//**

Gary Fusco
M&T Group Vice President, Technology Operations Support Services
