

Rocket® Modern Experience

Deliver top-notch experiences and drive more value from your IBM zSystems® and IBM® i applications

To remain competitive in today's digital business world, core applications on IBM zSystems® and IBM® i must continue to deliver value to customers. Rocket® Modern Experience (MX) is a central management platform that synchronizes every green screen in your organization and enables deployment of pre-built or dynamically customized UI templates—no COBOL or RPG expertise required.

Benefits/Features

Rocket MX & Automation workbench

Allows users to build optimized workflows that connect complex green screens to a web- or GUI-based interface.

Robust technology

Built on display logic, not screen scraping, MX automatically identifies whether any changes made to source applications will affect functionality on web or mobile devices, making applications easier to maintain.

Centralized management

MX offers a single window to manage multiple green-screen workflows, data sets, and processes.

Modern, intuitive user interface

Enables deployment of pre-built or dynamically customized UI templates—no COBOL or RPG expertise required.

Flexible deployment

With options with web and desktop editions.

What our customers have to say

“The relationship from proof of concept through implementation and beyond is unmatched. Rocket really puts their customers first, just as we do.”
