Are You Looking to:

❖ Exchange documents and files of any type and size securely with internal and external business partners

❖ Accelerate the time transferring your critical and large documents

❖ Control and monitor the exchange of sensitive information

❖ Collaborate with employees, customers and partners across the globe

Secure Managed File Transfer

Rocket® TRUexchange is a highly secure, on-demand, easy to use solution that allows your organization the ability to exchange files and documents of any type and size quickly and securely.

Organizations can leverage Rocket TRUexchange to connect and share with business partners in any geography, regardless of time zone or system configuration.

Advanced Security and Encryption

Rocket TRUexchange provides superior security to that of traditional methods such as email and FTP. This is accomplished by providing multiple levels of encryption throughout the file transfer process, including both public and private key—pairs between both senders and recipients of documents and files. This ensures that only the intended parties can every access those documents.

All data is encrypted and decrypted locally before any data transfer takes place, ensuring the most secure method of delivering documents and files.

Size and Speed

Rocket TRUexchange is proven as a leader in sending files both quickly and exceeding typical transaction file size limitations of other products and methods of delivery.

Files exceeding 2GB are commonplace when working with product design data and Rocket TRUexchange manages this and extremely fast transfer speeds with its proprietary Java Applet.

Integration Made Simple

Rocket TRUexchange is delivered through a Software as a Service (Saas) model, connecting our solutions to thousands of customers on demand - over the internet, anytime, anywhere in the world.

Combining the benefits of SaaS and enterprise application extensions, Rocket Software integrates organizations and automates critical business processes.

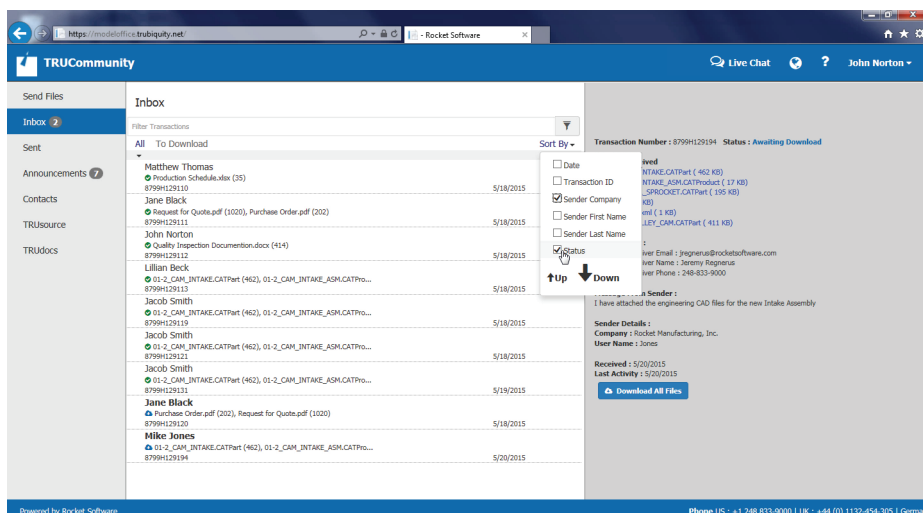

Figure 1: Rocket TRUexchange makes it easy to send, find and download important data in any format from your business partners.

Rocket

Getting started with Rocket TRUexchange is as simple as logging in and connecting with other users and organizations.

Sending and receiving even the largest files is as easy with a streamlined interface. Your organization can start benefiting from Rocket TRUexchange immediately as there is virtually no learning curve to using the tools.

Support and Implementation

Rocket Software backs you up with an experienced team of support staff who have implemented and migrated thousands of users from legacy managed file transfer tools with limited impact on productivity.
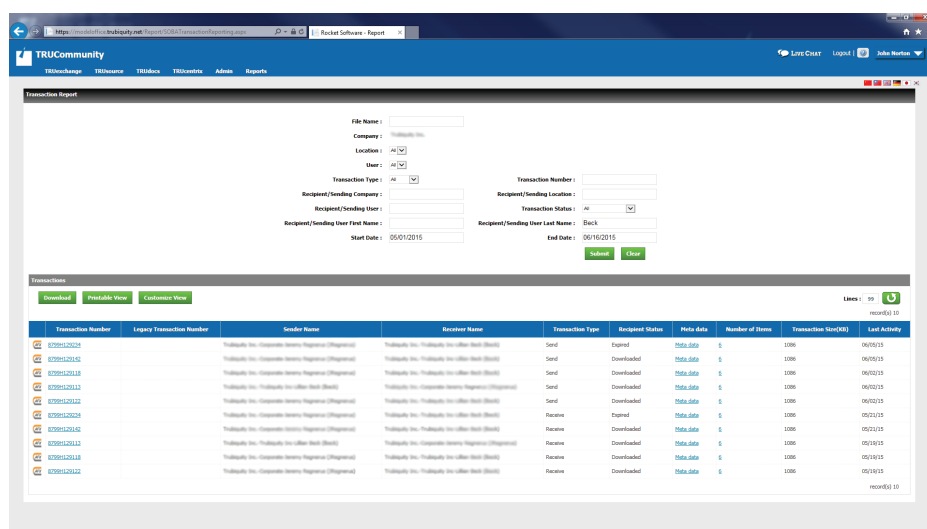

Rocket Software can help onboarding both internal and external partners; from small business partners to global enterprise organizations.

Rocket Software's support staff is also provides 24/7 support as you continue to use Rocket TRUexchange for any additional needs and services you may require in the future.

Customized Experience

Organizations around the globe using Rocket TRUexchange also benefit from private communities that provide additional encryption, additional approval and authorization control for community access and more.

If you're looking to create your own private community for your customers, suppliers and other internal and external business partners, Rocket Software can work with you to provide additional benefits within Rocket TRUexchange.
