

ASG-TMON® PERFORMANCE ANALYZER FOR VMWARE

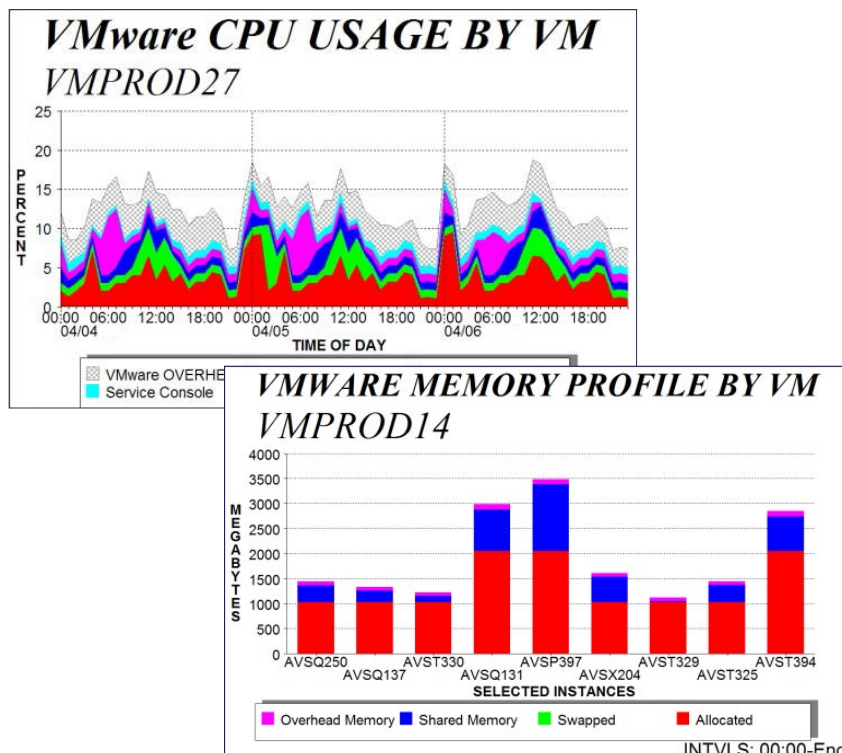

For Discovery, Analysis, Planning, Consolidation, Implementation, Monitoring, and Management of VMware Environments

OVERVIEW

ASG-TMON® PA for VMware combines agentless data collection with powerful modeling capabilities to aid data centers with planning, consolidating, implementing, optimizing, and managing VMware ESX environments.

ASG-TMON® PA for VMware, complemented with ASG-TMON® PA for Windows and/or ASG-TMON® PA for Linux, provides a total view of an ESX server, its virtual machines, and the details of what is happening within each virtual machine, such as process-level resource consumption and disk space utilization for each logical disk or file system.

ASG-TMON® PA for VMware blends virtual machine performance data with VMware ESX performance data to create a centralized measurement and analysis view of the physical and virtual configurations. It simplifies complexity to further enable true cost savings through virtualization and consolidation. The ability to model “what if” scenarios removes the guesswork from finding good server consolidation candidates, and automated reporting aids in effectively communicating throughout the organization, making virtualized server line of business owners comfortable with the new environment.

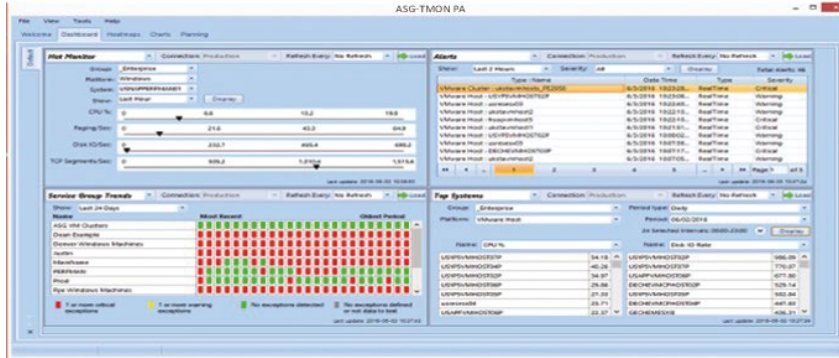

BENEFITS

- Non-intrusive, low-overhead architecture requiring no agents and full cluster support
- Ability to collect data through VirtualCenter, moving the already-low overhead off of the ESX Server
- High scalability, allows central management of thousands of physical and virtual systems
- Fastest deployment and time-to-value in the industry
- Fully automated data collection, analysis, and reporting
- Modeling provides “what if” capabilities for consolidating physical to virtual images, moving virtual machines between hosts, and making changes to existing configurations
- Provides historical trending and forecasting capabilities
- Ability to securely manage systems through firewalls
- Centralized control drastically reduces administrative overhead and human error
- Unique focus on historical trending takes the guesswork out of tuning and IT purchasing decisions
- Includes browser-based report-publishing option
- Exception analysis
- Built-in analysis and reporting for all VMware ESX metrics

ASG-TMON® PA PORTAL - AN EXECUTIVE DASHBOARD

ASG-TMON® PA Portal provides cross-platform visibility to the entire enterprise IT infrastructure through a single, easy-to-use interface.

ASG-TMON® PA ANALYST

ASG-TMON® PA for VMware includes ASG-TMON® PA Analyst, a powerful, Microsoft Windows-based analysis tool. ASG-TMON® PA Analyst is an easy to use desktop solution that simplifies access to charts and tools using an intuitive Navigator and Data Selector. Here is a sampling of just a few of ASG-TMON® PA Analyst's features:

- Chart Customization is simple using ASG-TMON® PA's SmartChart point and click feature. Change the charts to reflect specific needs. Add notations, change the colors, styles, etc.
- Powerful Scripting allows reporting and analysis to be automated eliminating expense and tedium
- Web-based reporting makes it easy to put reports on the intranet or extranet for on-demand access
- Data Organization - Keep data organized by system and period to efficiently handle months, weeks, and days
- Platform Integration - ASG-TMON® PA Analyst integrates all the platforms right in the same analysis tool. Learn it for one platform, learn it for all platforms.
- Desktop Integration - Results can be saved, printed or exported to spreadsheet or presentation packages with point and click ease

ASG-TMON® PA PORTAL BENEFITS

- Gain insight into the entire infrastructure via the web-based dashboard
- Produce sophisticated role-based reports and view resources by service, line of business, location, application, and more
- Quickly identify current and future problem areas
- Capture a snapshot of hundreds or thousands of multi-platform systems
- Compare and analyze key indicators across platforms to monitor performance
