

Rocket® Extra! X-treme

(formerly a Micro Focus® product)

Rocket® Extra! X-treme is a Windows-based terminal emulator that connects users to IBM®, UNIX, and Linux hosts. Easy to use, easy to manage, and highly secure, Rocket Extra! X-treme provides all the features you need to get the most from your mainframe applications.

Product highlights

Fewer keystrokes, faster

With Rocket Extra! X-treme, users avoid extra keystrokes that over time can contribute to productivity loss. Because Rocket Extra! X-treme is integrated with Microsoft Office, users can complete repetitive actions much faster and more accurately with productivity features such as Rocket® AutoComplete*, Rocket® AutoExpand*, Rocket® Spell Check*, Rocket® Scratch Pad*, Recent Typing, and Screen History. And now they can even print screen histories, personalize fonts in Scratch Pad, and format copied text more easily.

Enhanced control and flexibility

Rocket Extra! X-treme gives you even greater customization options — plus more powerful configuration tools. Enhancements to the Custom Installation Wizard enable you to completely customize the software before deployment to end users. You can also save valuable resources by using Group Policy Administrator to centrally manage settings files. And Rocket Extra! X-treme offers support for other important Windows administration features, such as Microsoft Installer, Active Directory, and roaming user profiles.

Quick view

Leverage emerging and existing technologies with support for Microsoft Windows 11, Windows 10, Microsoft Windows Server 2022/2019/2016.

Improve productivity with Office productivity features such as AutoComplete, AutoExpand, Spell Check, and Screen History.

Create and deploy Extra! sessions, keyboards, and macros from a central location.

Protect data in motion with, TLS 1.3, SSH, elliptic curve cryptography (ECC), SHA-256/RSA-2048 digital signatures and FIPS 140-2-validated SSH and TLS crypto modules.

Bolstered security

Rocket Extra! X-treme delivers powerful, enhanced security that helps you meet important internal and external security requirements. With the Rocket® Reflection Secure FTP Client*, you can safeguard your data in motion using SSL/TLS, SSH, and Kerberos. And Rocket Extra! X-treme's SSH cryptography is now validated for FIPS 140-2 — plus, it's been updated to provide even stronger security. You can even use the new FIPS-mode Group Policy setting to safeguard users' mission-critical data as it travels across the network.

Support for the modern desktop

Rocket Extra! X-treme supports a mix of existing and emerging IT technologies, including Windows 11, Windows 10, Windows Server 2022, Windows Server 2019, Active Directory, and Group Policy; Microsoft App-V, VMware, and Citrix Virtual Apps and Desktops (formerly XenApp); and IPv6 and 64-bit computing.

In addition to Rocket Extra! X-treme, Rocket offers Rocket Reflection Desktop*, the host access game changer, which includes modern security, productivity, developer, and administrative functionalities that make it the most advanced terminal emulator on the market.

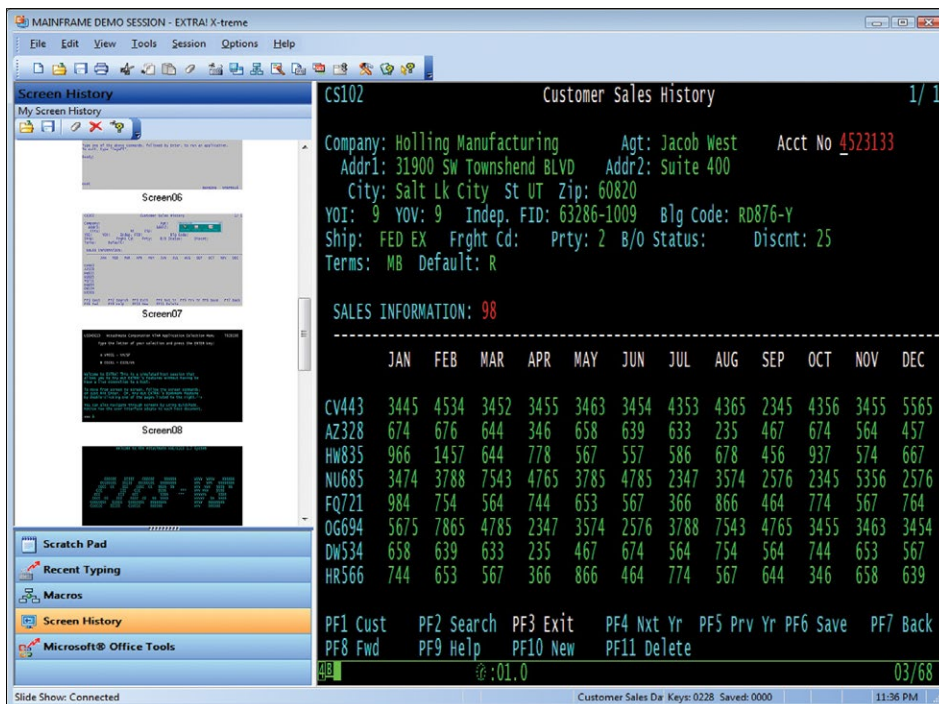

Fig 1. The Screen History function enables users to view and copy information from previous screens, and paste it into current active screens with mouse-click ease.
