USE THE RIGHT JCL MANAGEMENT TOOL FOR YOUR IBM Z/OS MAINFRAME ENVIRONMENT

Meet the unique requirements of your enterprise for managing job control language (JCL)

With ASG JCL management offerings, you can ensure an error-free, standardized and optimized mainframe ecosystem based on your z/OS mainframe configuration and application development approach.

ASG-PRO/JCL®

Advanced JCL management with DevOps for parallel-sysplex IBM Z environments

MODERNIZE AND ACCELERATE JCL MANAGEMENT
Leverage fast remote scanning, extensive integrations, detailed simulations and advanced automation

INCLUDE JCL IN YOUR DEVOPS TOOLCHAIN
Manage JCL from modern Eclipse IDEs like Compuware Topaz Workbench and IBM IDz

EXTEND AUTOMATION WITH A RESTFUL API
Integrate with leading continuous integration/continuous delivery (CI/CD) tools like Jenkins to automate critical JCL operations

ASG-JOB/SCAN WITH DEVOPS ENABLEMENT

Standard JCL management with DevOps for single-system sysplex IBM Z environments

ENSURE JCL MANAGEMENT MEETS YOUR STANDARDS
Leverage proven, reliable functions for standard JCL scanning and validation

### GO BEYOND 'STANDARD' WITH DEVOPS ENABLEMENT
Optional DevOps enablement brings JCL management into modern Eclipse IDEs and integrates with CI/CD solutions for automation
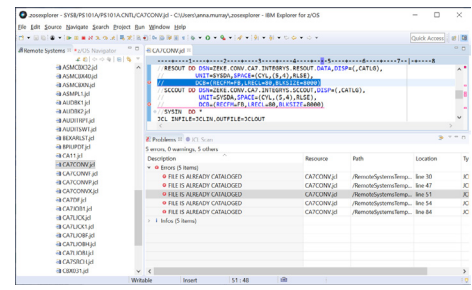

ASG-JOB/SCAN

Standard JCL management for single-system sysplex IBM Z environments

### CONTINUE TO ENSURE JCL EFFECTIVENESS
Leverage proven, reliable functions for standard JCL scanning and validation in a familiar ISPF green screen context familiar to experts

ASG-PRO/JCL within the Compuware Topaz Workbench IDE

ASG-JOB/SCAN within the IBM IDz IDE, available with the DevOps Enablement package

Standard ASG-JOB/SCAN within ISPF
