

Rocket® Process Insights

End-to-end deep visibility into IBM® i and IBM Z® workflows and applications

To remain productive and competitive, fast-growing organizations are modernizing their IBM® i and IBM Z® applications. The initial challenge, however, is knowing where to start. In-depth visibility into workflows and data processes hidden behind IBM i and IBM Z application green screens is needed to understand better how they are utilized, how they should be optimized, or where improvements in UI and automation will provide the most significant value. Rocket® Process Insights is a visualization solution that gives you the clarity you need to overcome this ambiguity and build traction towards full IBM i and IBM Z modernization and optimization.

Benefits/Features

Visualize end-to-end workflows

Obtain clear visibility into every green-screen data process and workflow through Rocket Process Insights (no RPG or COBOL expertise required). Rocket Process Insights generates heat maps that reveal commonly accessed datasets, workflows, and instances showing how the business engages with each IBM i and IBM Z application.

Prioritize high-value IBM i and IBM Z workflows

Leverage heat map data from Rocket Process Insights to align and prioritize modernization efforts across your organization. Build a strategic and data-driven modernization plan with no guesswork, prioritizing investment in high-impact workflows that have a significant bearing on future productivity and user experience of your IBM i and IBM Z application to increase its value to the business.

Ensure quality user experience with modern UI

Rocket Process Insights heat maps provide valuable guidance on where to direct efforts to improve user experience. Go straight into execution with your UX modernization tool (i.e., [Rocket® Modern Experience](#)) to transform green screens into modern interfaces, so your organization remains responsive and agile to market and customer needs.

Streamline workflows through automation

With end-to-end visibility of your IBM i and IBM Z workflows achieved through Rocket Process Insights, your business can make the seamless implementation of APIs the cornerstone of your smart modernization efforts. With a simple click of a button, Rocket Process Insights can trigger the creation of APIs informed by your IBM i and IBM Z workflows' data and seamlessly connect to a low-code automation tool like Rocket® API, which allows you to eliminate manual and repetitive processes with ease, improving productivity, and increase savings.

What the market says

Today's businesses rely on their IBM i systems to run hundreds of critical applications that are vital to their operations. For those businesses, a data-informed IBM i modernization plan will immediately and positively impact business productivity and ROI. Rocket Process Insights delivers needed insights into workflows that enable businesses to modernize and evolve their IBM i platforms without disruption to current operations."

PETER RUTTEN
Research Director
Performance Intensive Computing Solutions, IDC

With Rocket Process Insights you can:

Initiate a data-driven modernization plan

Track and analyze every data interaction or workflow utilization within every IBM i and IBM Z application to understand what's mission-critical for your organization.

Prioritize decisions and investment

Leveraging heat map data helps prioritize investment in high-impact workflows that have a significant bearing on the future productivity and user experience of your IBM i and IBM Z application.

Eliminate the lag between discovery and automation

Rocket Process Insights can easily trigger the creation of APIs informed by your IBM i and IBM Z workflows' data with a simple "click of a button," saving you time and money.

Enable non-RPG/COBOL experts

Rocket Process Insights can be used by analysts and developers regardless of their knowledge of RPG or COBOL.

Modernize with Rocket Solutions for IBM i and IBM Z

Meet digital age demands while maximizing your IT investment. Future-proof your mission-critical applications with Rocket Solutions to keep your business ahead of the curve.

Modernization. Without Disruption.™
