

# Rocket® Reflection® for Secure IT Server for UNIX

(formerly a Micro Focus® product)

Rocket® Reflection® for Secure IT Server for UNIX is an SSH server that provides secure file transfer and remote administration for UNIX or Linux servers. It is part of the Rocket Reflection for Secure IT family of Secure Shell clients and servers for Windows and UNIX/Linux – all designed to protect data in motion. With these products, you can safely transfer sensitive data, manage remote servers, and access corporate applications over encrypted connections.

## Product highlights

### Secure internet file transfers

Confidently exchange private files with business partners and customers over the Internet.

### Secure remote system administration

Use interactive access, scripting, and APIs to automate and schedule routine system administration tasks over a secure channel.

### Secure application access for users

Protect the network communications of any TCP/IP-based application.

## Quick view

Replace nonsecure Telnet and FTP with a secure, encrypted alternative.

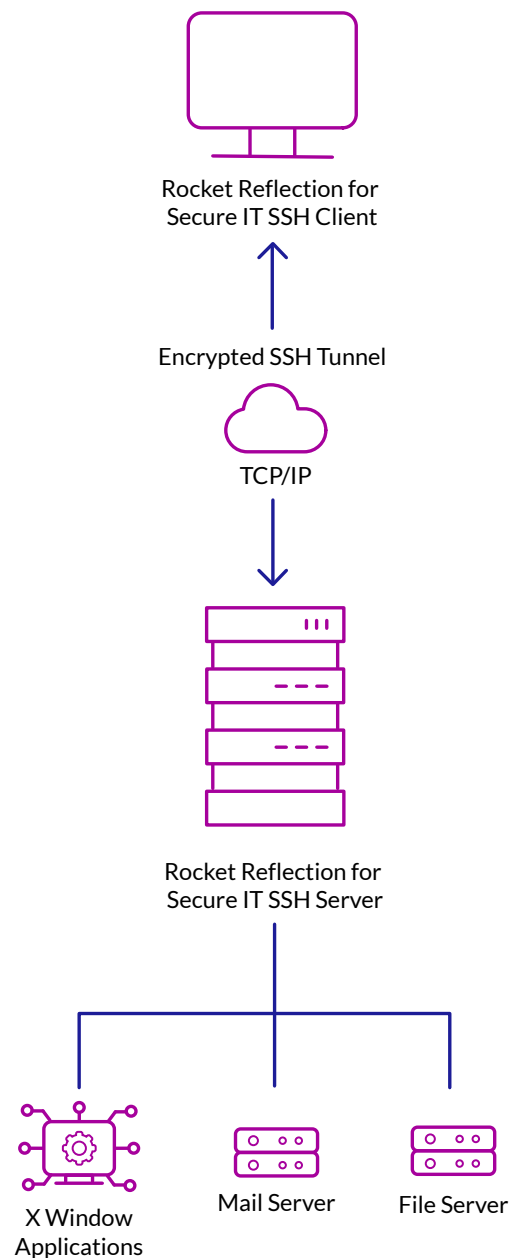

Secure remote administration of critical servers, even over untrusted networks.

Safely transmit sensitive data and ensure that transfers are completed.

Access any TCP/IP-based application through a secure transmission tunnel.

Rocket Reflection for Secure IT Server for UNIX includes a single license of Rocket Reflection for Secure IT Client for UNIX.

**Fig 1.** Together, the SSH client and server form a secure “tunnel” through which all communications travel.

**Modernization.** Without Disruption.™
