Rocket AS
Rocket AS *** Public Library Applications

Are you fully exploiting this free Rocket AS resource?

The AS *** Public Library in V6.3 contains over 1100 AS tables of the following types:
o 830 Language
  • 603 Command (27 Compose, 21 Cross Tabulate, 6 Edit, 168 Image, 13 Model, 300 Procedure, 3 Query, 61 Report, 1 Update, 3 Xtabulate)
  • 227 Specification (78 Draw, 35 Data, 3 Environment, 59 Network, 61 Report, 22 Workplace)
o 347 Data

All *** library tables are listed in the 'Public Library Index' which can be selected from the DEMONSTRATE Workplace (the index displays the AS table ***Demo/##Index). Most of the tables are presented in subject area Workplaces within DEMONSTRATE (for example, Analysis and Tabulation and Developer's Toolkit).

All these tables are available to you for testing and demonstrations and, perhaps more importantly, as worked examples to assist you in your application development. You may copy any of them and adapt them to suit your needs. For example, to copy and edit procedure ***Demo/EGIP19 which illustrates how to use check boxes and radio buttons in AS applications, use the command:

Language ***Demo/EGIP19,MyApp1

Most *** library tables include table help text so that you check the function of a table before you select it from a list, as shown below:
