# IBM i for the Digital Age

With more than 28 years of commitment to the success of IBM customers, Rocket is uniquely qualified to deliver solutions that enable you to leverage the latest web, mobile, and cloud technologies, while protecting your investment in IBM i. Our portfolio of modernization products lets you extend the value of your proven applications by transforming the way they engage customers and employees. With new or enhanced user experiences, web UIs, and APIs you can deliver capabilities with improved usability and greater productivity—without disrupting your underlying systems. The integrated DevOps capabilities in Rocket's modernization solution enable IT to automate deployments and connect with open source and distributed systems DevOps tools.

Rocket solutions for IBM i provide fast, efficient ways to evolve your business systems so that you can more easily keep pace with emerging opportunities and business challenges.

## Rocket® Aldon Lifecycle Manager®

#### For Application Developers

Manage and automate DevOps for IBM i, Windows, web, and mobile.

- Simplify audit compliance
- Automate promotions
- Build everything automatically-including your mobile apps
- Version and store your source code securely
- Track application usage with automated analytics
- Keep all devices up to date
- Track and manage your change requests

#### For IT Operations Managers and Release Managers

Easily manage and automate deployments across multiple platforms with consistent, auditable processes.
