Simple, cost-effective HA/DR for IBM i

ALM & DevOps

# Rocket® Aldon Lifecycle Manager

For Application Developers

Manage and automate DevOps for all your platforms including IBM i, Windows, web, and mobile.

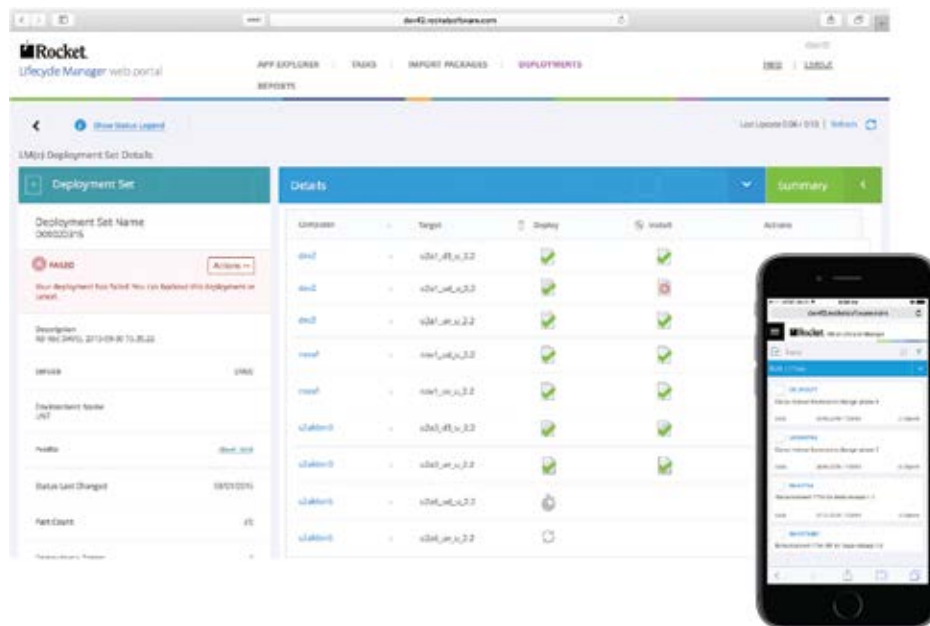

- Simplify audit compliance
- Automate promotions
- Automatically build everything—including your mobile apps
- Securely version and store your source code
- Track application usage with automated analytics
- Keep all devices up to date
- Track and manage your change requests

For IT Operations Managers and Release Managers

Easily manage and automate all application deployment to your enterprise targets.

- Automate and synchronize web, mobile, windows, MultiValue and IBM i deployments
- Get success/failure notifications
- Gain visibility into log reports
- Back-out deployments with a push of a button
- Gain integrity verification
- Manage versions
- Track history

Rocket® Aldon Community Manager

For Development Managers and Release Managers

Connect application development and IT services to collaborate and deliver
the right software at the right time.

- Define and manage software requirements from implementation
  to production

- Accelerate workflows and approval processes

- Respond to changes quickly in coordination with business objectives

Modernization

Rocket® API

For Application Developers

Service-enable your 5250 application functions for use with any web or mobile app.

- Orchestrate functions and data requests from multiple sources, platforms, and applications into composite services

- Automatically generate RESTful services from existing applications—no coding required.

- Create updated, flexible workflows with newly-generated web services

Rocket® LegaSuite

For Application Developers

Transform existing green-screen applications into new web or mobile user experiences.

- Rapidly convert 5250 green-screen applications
- Create flexible HTML5-based apps for desktops, web, or mobile devices
- Streamline business processes and workflows

Data Protection

Rocket® Servergraph

For Backup Administrators and IT Operations Managers

Reduce the cost and complexity of monitoring and reporting on the IBM i platform.

- Save on costs and resources by automating IT processes and recovering storage space

- Isolate and resolve issues before they affect performance via a single view

- Simplify audit preparation and ensure compliance with corporate policies and regulatory requirements

- Get the right information to the right people at the right time

Rocket® iCluster

For Backup Administrators and IT Operations Managers

Get peace of mind and complete business continuity with High Availability / Disaster Recovery (HA/DR) replication solutions.

- Protect your business with real-time replication and immediate recovery

- Provide the highest fidelity through matchmerge of audit and database transactions

- Get high-speed operational switching and access between geographically distant locations during planned and unplanned downtime

- Empower any server to be the master for easy, fast configuration, with updates to all other servers automatically

- Replicate data to a data warehouse for near real-time analytics without affecting impact production systems

Businesses Run on Rocket

We make software that the world's biggest companies trust to run their critical infrastructure business processes, and data while extending the value of these assets to new innovations such as cloud, analytics, and mobile. More than 10 million IT and business professionals rely on Rocket to run their most critical applications, business processes, and data.
