

# Upgrading Rocket® Extra!® X-treme\* to Rocket® Reflection Desktop\*

Here is our four step process to upgrade from Rocket Extra! X-treme to Rocket Reflection Desktop. This guide provides an overview with links to more detailed information in our product documentation and knowledgebase articles.

## 01. Prepare

## 02. Account

## 03. Design

## 04. Implement

# 01

## Prepare

- [Design and Prepare for Deployment.](#)
- [Best Practices](#) for deploying Rocket Reflection Desktop.
- Plan and schedule Project Communication.
  - [Upgrading to Rocket Reflection Desktop.](#)
  - [Getting Started with Rocket Reflection Desktop Deployment.](#)
- Understand [Rocket Reflection Desktop](#) improvements from Rocket Extra! X-treme and a direct comparison of the two products here.
- Define resource requirements for inventory, planning, and implementation phases.

## 02

# Account

- Define user requirements for each user group.
- Inventory desktops for [session files and macros](#).
- Identify integration requirements.

## 03

# Design

- Assess what business processes need to be automated with macros.
- What security protocols are required by your organization? (TLS 1.3, SHA-256, ECC).
- Review [Extra! Basic macros](#) — inspect for known issues, security risks, see if they contain sensitive data.
- For macros you wish to keep long term, consider easily rerecording or writing in [Visual Basic for Applications \(VBA\)](#) for optimal performance and security.

\*formerly Micro Focus® products

## 04

# Implement

- Use existing Extra! session files in Rocket Reflection Desktop.
  - [Supported Extra! Files in Rocket Reflection Desktop](#).
  - [Compound Sessions — convert to compound sessions for simpler management](#).
  - [Protect data and privacy using Trusted Locations and Information Privacy](#).
- If needed, you can create and [customize Reflection sessions](#).
- [Configure security protocols](#) required by your organization.
- If using centralized management, [configure Rocket Host Access Management and Security Server \(MSS\)\\*](#) for Rocket Reflection Desktop sessions and authentication.
- [Package Configuration Files](#).
- Test on Rocket Reflection Desktop [supported platforms](#) in your environment.
- [Deploy](#) to your production environment.
