

# Rocket® Visual COBOL®\* Overview

Rocket Visual COBOL is the leading COBOL application development, deployment, and modernization solution for distributed, virtual, and cloud platforms.

## What are the benefits?

- Easy onboarding** for new developers using VS Code, Visual Studio or Eclipse combined with application understanding assistants that help developers get up to speed quickly.
- Move to Agile** development and DevOps practices with COBOL unit testing and continuous integration.
- Patented compiler technology** supports the latest COBOL standards and dialects.
- Flexible COBOL deployment** supporting latest releases of Windows, Linux, .NET, the Java Virtual machines, containers and the cloud.
- Modernization tools and new architectures**, including REST, JSON, code slicing, APIs, and more.

## Why is Rocket Visual COBOL different?

Rocket Visual COBOL is the key to transforming core business systems written in COBOL. Rocket Visual COBOL offers access to modern development tools including Visual Studio, Eclipse and VS Code, and modern architectures such as .NET, the Java Virtual Machine, containers, web services, cloud and more. Do more, much more, with your existing applications.
