

MV GenNext

2018 NOMINATION FORM

The MV GenNext Team is a group of enthusiastic young developers who are interested in sharing, discussing, and collaborating on innovative ideas about what can be accomplished with the MultiValue platform. Nominees should be developers that are unencumbered by 30 years of MV history, with a skillset that goes far beyond the MV platform language, with extensive education and expertise in modern tools, concepts and architecture. We believe this skillset provides a great foundation for a fresh view of possibilities for MV computing.
